Southeastern Community College Nursing Program Nursing Student Handbook

This student handbook has been developed by the faculty and administration of the Nursing Education Program of Southeastern Community College. Its purpose is to serve as a guide for all students enrolled in the Nursing Program. It is a supplement to the Southeastern Community College Credit Course Catalog and the SCC Student Handbook. Consequently, all policies and regulations from the college handbook and catalog are to be observed in addition to those outlined in the following pages. Each student is responsible for reading and compliance of the information contained in the handbook.

We welcome you and want you to know that we are here to assist you in every way possible.

Non-Discrimination Statement

It is the policy of Southeastern Community College not to discriminate on the basis of race, color, national origin, sex, disability, age, employment, sexual orientation, gender identity, creed, religion, and actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code §§ 216.6 and 216.9, Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. §§ 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688), Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and Title II of the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.).

Individuals having questions or complaints related to compliance with this policy should contact Tina Young, Title IX / Equity Coordinator, Southeastern Community College, 1500 W. Agency Road, West Burlington, IA 52655, email tyoung@scciowa.edu, phone number 319/208-5101, fax 319/208-5005 or the Director of the Office for Civil Rights, U.S. Department of Education, Citigroup Center, 500 W. Madison, Suite 1475, Chicago, IL 60661, phone number 312/730-1560, fax 312/730-1576.

Notice: Change in Catalog/Handbook Statement

The Southeastern Community College Nursing Program reserves the right to change courses, requirements, and policies that are stated in this catalog and handbook without advance notice. Students will be informed of changes by email, mail, flyers, posts, and/or announcements.
The Nursing Program Handbook is updated and distributed to students annually at the beginning of the program.

Enrollment of the student is considered to constitute his/her agreement to comply with all established policies and standards of conduct of the college and nursing program.

A high standard of conduct is expected of student enrolled in the nursing program. It is understood that policies are purposeful and essential for the protection of the students and the Southeastern Community College. The reputation of the SCC Nursing Program is established by the character and performance of its students and graduates.

Knowledge of information contained in the SCC Credit Course Catalog and Nursing Program Handbook is the responsibility of each student. The following form is signed by the student and returned to the Director of Nursing and maintained in the student file.

I, _______________________________________ acknowledge receiving the Nursing Program Handbook on ____________
   ____________________________
   (print name)   (date)

I understand that I am expected to familiarize myself with the policies and procedures contained in the SCC Credit Course Catalog, SCC Student Handbook and Nursing Program Handbook and that I am held accountable for the information contained and any supplements that may be added. Failure to comply with these policies and procedures could ultimately result in dismissal from the nursing program.

Section I  Program Overview

SOUTHEASTERN COMMUNITY COLLEGE NURSING PROGRAM PHILOSOPHY

Southeastern Community College Nursing Faculty is committed to fulfilling the mission of the institution by preparing students for entrance into or advancement within the nursing profession. The Nursing Program ascribes to the philosophy of Southeastern Community College. Through education, the Nursing Program attempts to maximize potential of both traditional and non-traditional students while helping to increase their socio-economic status and ability to contribute to the community.

All individuals are complex beings and possess individual dignity and worth. They are comprised of biological, physiological, psychological, social-cultural, and developmental dimensions that are interrelated to make individuals whole and unique. However, individuals are constantly evolving as they interact with a changing environment. Individuals have the capacity to make choices and must accept responsibility for these choices.

Health is a dynamic state that changes with time and varies according to circumstances. Optimal health exists when individuals are able to manage their own needs and function within their total capabilities. Illness results when the individual's actual and/or perceived needs adversely affect their ability to function.

Environment is all that is external to individuals and is composed of biological, physical and social components. There is a functional relationship between health and environment. Individuals should be assisted in establishing an environment that is conducive to achieving their optimal level of health.

Nursing is a profession based on interpersonal, intellectual and technical skills. It is directed toward the goals of assisting the individual to promote, maintain and/or restore their optimal level of health. Through utilization of a decision-making process called the nursing process, nursing focuses on meeting the actual and/or perceived needs of the client/patient. The nurse may assume the role of caregiver, communicator, manager, and member of the profession while planning, directing and providing nursing care. Continual consideration is given to the legal and ethical aspects that accompany these roles. Underlying all nursing activity is the concept of caring.

Education is a continuous learning process. It provides individuals an opportunity to grow so they can function within their total capabilities. Individuals have the right and responsibility to respond and be an active participant in the learning process. Through both formal and a variety of structured clinical experiences, individuals progress from simple to complex in their learning and are allowed the opportunity to directly apply knowledge.

The educator assumes the role of facilitator and resource person who transmits knowledge, evaluates, and is a role model. This educator enhances learning by creating a positive environment and portraying a caring and supportive attitude.

Nursing faculty is committed to the education of the practical nurse (PN) and Associate Degree Nurse (ADN). SCC believes a common core of knowledge exists which allows a ladder concept in nursing education. That concept empowers learners to move forward, increasing the responsibilities for which they are accountable within the profession. Rising acuity levels, increasing number of aging and diverse populations, and changes in health care delivery systems has resulted in continued need for LPNs and ADNs.

PN education focuses on the preparation of nurse graduates who assist in the application of the nursing process while providing nursing care for individuals with predictable health needs under the direction of an RN or Physician in a variety of health care settings. ADN education focuses on the preparation of nurse graduates who apply the nursing process in providing nursing care for individuals with variable health needs in a variety of health care settings.
NURSING CURRICULUM

Practical Nursing

BIO-168 HUMAN ANATOMY & PHYSIOLOGY I
Lecture: 3 Lab: 2 Credit: 4
The first of a two-semester sequence providing a comprehensive study of the anatomy and physiology of the human body for college transfer and/or allied health pre-requisites. Topics include body organizations; homeostasis; cytology; histology; and the integumentary, skeletal, muscular, nervous systems, and special senses. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. Laboratory component includes anatomical studies using microscopy and dissection of selected organisms as well as the study of physiological concepts via experimentation. It is highly recommended that a student complete this series (BIO-168 and BIO-173 at SCC in order to maintain transferability to four-year institutions.

BIO-170 HUMAN ANATOMY & PHYSIOLOGY II
Lecture: 3 Lab: 2 Credit: 4
The second of a two-semester sequence continuing the comprehensive study of the anatomy and physiology of the human body for college transfer and/or allied health pre-requisites. Includes the study of endocrine, cardiovascular, lymphatic/immune, respiratory, digestive, urinary and reproductive systems. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. Laboratory component includes anatomical studies using microscopy and dissection of selected organisms as well as the study of physiological concepts via experimentation. Pre-requisite: BIO-168 with a minimum grade of C.

ENG-105 - COMPOSITION I
Lecture: 3 Lab: 0 Credit: 3
Description: A study of the principles of writing. Emphasis on rhetoric, mechanics, and development of expository patterns: narration, description illustration, comparison/contrast, classification, process, and cause/effect. Required for AA and AS Degrees. Prerequisites: Mandatory COMPASS, ACT or AccuPlacer test score and mandatory eWrite or WritePlacer score (per SCC Writing Scores & Mandatory Course Placement Chart), or a C- or above in ENG-061, College Preparatory Writing II. No waivers.

PNN-160 - INTRODUCTION TO NURSING PRACTICE
Lecture: 2 Lab: 0 Credit: 2
Description: This course provides the student with an introduction to nursing concepts and principles. From a historical perspective, the student will explore the roles and challenges of the nurse in the health care continuum. The curriculum strand of the nursing process is introduced and serves as the foundation for the development of critical thinking skills. Other curriculum strands introduced include communication, stress and adaptation, wellness, professional accountability, information technology, time management and priority setting. Prerequisite: CNA Certification in Iowa. Co-requisite: PNN-220.

PNN-220 - PHARMACOLOGY FOR NURSING I
Lecture: 2 Lab: 0 Credit: 2
Description: This course introduces the student to the basics of pharmacology. Principles of drug administration, including dosage calculation and routes and techniques of administration are presented. Legal/ethical considerations, as related to drug therapy, are discussed. An overview of drug classifications, drug actions, common adverse reactions, and nursing interventions are included. Emphasis is placed on nursing responsibilities in drug therapy, including safe administration of all drugs. Co-requisite: PNN-160.

BIO-186 - MICROBIOLOGY
Lecture: 3 Lab: 2 Credit: 4
Description: A study of microbial populations and their relationships to the human in health and diseases. Prerequisites: A grade of C or better in BIO-252 or CHM-65 and BIO-112.

PNN-534 - MEDICAL-SURGICAL NURSING I
Lecture: 8 Lab: 1 Clinical: 12 Credit: 12.5
Description: This course builds on concepts and strands previously presented in the curriculum. A systematic approach is utilized in providing nursing care to individuals across the lifespan (pediatrics, adult and geriatrics). The course emphasizes selected common and chronic alterations in health. The curriculum strands which are introduced include psychosocial, cultural and spiritual concepts, nutrition, and safety and infection control. An opportunity is provided for students to apply theoretical knowledge, to utilize the nursing process, and to practice nursing techniques in clinical settings. Prerequisites: PNN-160, PNN-220 and BIO-177.

PSY-121 - DEVELOPMENTAL PSYCHOLOGY
Lecture: 3 Lab: 0 Credit: 3
Description: A systematic study of life-span development. Individual differences in behavior as well as cultural norms are considered in relation to heredity and environment.

PNN-311 - PN ISSUES AND TRENDS
Lecture: 1 Lab: 0 Credit: 1
Description: This course is an overview of the role of the licensed practical nurse. Ethical and legal responsibilities of the nurse are identified. Levels of practice, licensure, career opportunities, and job-seeking skills are addressed. Opportunities for professional growth are explored. Prerequisite: PNN-534. Co-requisite: BIO-186.

PNN-535 - MEDICAL-SURGICAL NURSING II
Lecture: 8 Lab: 0 Clinical: 12 Credit: 12
Description: This course continues to incorporate concepts and strands previously presented in the curriculum. A systematic approach is utilized in providing nursing care to individuals and families across the lifespan (pediatrics, adult and geriatrics). This course emphasizes selected common and chronic alterations in health and includes essential content related to maternity care. An opportunity is provided for students to apply theoretical knowledge, to utilize the nursing process, and to practice nursing techniques in clinical settings. Prerequisite: PNN-534. Corequisite: PNN-311.

Associate Nursing Degree

ADN-145 - ROLE TRANSITION
Lecture: 1 Lab: 0 Credit: 1
Description: This course allows associate degree nursing students to explore the role expectation of the registered nurse and facilitate the transition from practical nursing to registered nursing. An emphasis is placed on health education and advanced application of the nursing process. Prerequisite: PNN (Level I) Curriculum.

ADN-221 - PHARMACOLOGY II
Lecture: 2 Lab: 0 Credit: 2
Description: This course focuses on concepts of pharmacology with special emphasis on the role of the nurse in developing a comprehensive approach to the clinical application of drug therapy through the use of the nursing process. Understanding how drugs work and their relationship to expected outcomes and possible adverse reactions is explored. Recognition of safe dosage ranges, potential interactions, patient factors that affect drug actions, and safe administration techniques are included. The education of clients about their drug therapies is a crucial component. Prerequisite: PNN (Level I) Curriculum. Co-requisite: ADN-145.

PSY-111 - INTRODUCTION TO PSYCHOLOGY
Lecture: 3 Lab: 0 Credit: 3
Description: A basic course in the understanding of behavior, designed to give the student a scientific background in the fundamental problems and techniques covered in the field of psychology.

ADN-641 - NURSING III
Lecture: 8 Lab: 1 Clinical: 18 Credit: 14.5
Description: This course integrates concepts previously presented in the curriculum. A systematic approach is utilized in planning and providing nursing care to individuals, families, and groups across the lifespan (pediatrics, adult and geriatrics). This course emphasizes selected acute and complex alterations in health and includes advanced content related to maternity care. An
opportunity is provided for students to expand their theoretical knowledge, to broaden the application of critical thinking to the nursing process, and to refine their nursing skills in clinical settings.  

**SOC-110 - INTRO TO SOCIOLOGY**

**Lecture:** 3  **Lab:** 0  **Credit:** 3

**Description:** An analysis of social organization (or the social order). This course deals with the nature of sociology as a science, the original nature of man, the socialization of the individual, the development of groups and group behavior, the nature of culture and culture patterns, the organization of institutions, the nature of social order, the organization of human stratification and examination of major social processes. Special emphasis is placed upon the American cultural patterns.

**ADN-311 - RN ISSUES AND TRENDS**

**Lecture:** 1  **Lab:** 0  **Credit:** 1

**Description:** This course assists the associate degree nursing student to begin the transition to an autonomous nursing practice. Career development, opportunities, and challenges of the registered nurse are explored in relation to changing health care trends. Principles of leadership and management are introduced. Prerequisite: ADN-641.

**ADN-642 - NURSING IV**

**Lecture:** 8  **Lab:** 0  **Clinical:** 18  **Credit:** 14

**Description:** This course integrates concepts and strands previously presented in the curriculum. A systematic approach continues to be utilized in planning and providing nursing care to individuals, families, and groups across the lifespan (pediatrics, adult and geriatrics). This course emphasizes selected acute and complex alterations in health and includes advanced content related to mental health. An opportunity is provided for students to expand their theoretical knowledge, to extensively apply critical thinking to the nursing process, and to continue to refine their nursing skills in clinical settings. Prerequisite: ADN-641.

**SOUTHEASTERN COMMUNITY COLLEGE**

**Nursing Program**

**CONCEPTUAL FRAMEWORK**

The Philosophy of Southeastern Community College's Nursing Program reflects the beliefs of the nursing faculty about LPN and ADN practice and education and provides the purpose and basis for the organizational framework for both nursing programs. The Philosophy is based upon the four domain concepts of nursing, including the individual, environment, health and nursing. Educational concepts are also reflected in the Philosophy and help to identify the uniqueness of our nursing programs.

The nursing and educational concepts are integrated throughout the curriculum of both programs. The classroom, laboratory, simulation, and clinical experiences progress from simple to complex and build upon individual prior life experiences and learning. Knowledge gained from liberal arts and science courses is integrated with nursing knowledge. Each individual shares in the responsibility for their learning. This allows individuals to develop a broad knowledge base which can be used to enhance the application of the nursing process and execute skills to promote, maintain and restore optimal health of clients/patients in health care settings.

There is a common core of nursing knowledge and skills for both the PN and ADN graduate that allows for the utilization of the ladder concept for program design. The curriculum is organized into two levels, one that focuses on PN education and the other that focuses on ADN education.

The Philosophy identifies that all individuals are complex beings and possess individual dignity and worth. The interrelationship of the biological, physiological, psychological, social-cultural, and developmental dimensions make individuals whole and unique. However, individuals are constantly evolving as they interact with a changing environment. Individuals have the capacity to make choices and must accept responsibility for these choices.

Health is a dynamic state that changes with time and varies according to circumstances. Optimal health exists when individuals are able to manage their own needs and function within their total capabilities. Illness results when the individual's actual and/or perceived needs adversely affect their ability to function. It is at this time that individuals become clients/patients of nursing.
The Philosophy identifies environment as all that is external to individuals. It is composed of biological, physical, and social components. There is a functional relationship between health and environment. Individuals should be assisted in establishing an environment that is conducive to achieving their optimal level of health.

Nursing is a profession based on interpersonal, intellectual and technical skills. It is directed toward the goals of assisting the individual to promote, maintain, and/or restore their optimal level of health. Through utilization of a decision-making process called the nursing process, nursing focuses on meeting the actual and/or perceived needs of the client/patient. The nurse assumes the role of caregiver, communicator, manager, and member of the profession. Nurses are accountable for their nursing practice as well as their own personal and professional growth.

The nursing process and nursing roles are integrated into the curriculum in the following manner:

**NURSING PROCESS**

The nursing process is the decision-making process used by the nurse in promoting, maintaining, and restoring the optimal health of individuals. It is comprised of the five steps of assessment, nursing diagnosis, planning, implementation, and evaluation. The nursing process provides the means by which nurses fulfill their professional and legal responsibilities. Complete and accurate documentation of each step demonstrates professional competence, responsibility and accountability in meeting client/patient health care needs.

**Assessment**

PN
- Assists with collection of data from readily available sources

ADN
- Collects biological, physiological, psychological, socio-cultural, and development data from a variety of sources

**Nursing Diagnosis**

PN
- Identification of predictable health care needs

ADN
- Formulates nursing diagnoses based on health assessment data

**Planning**

PN
- Assist in establishing client/patient-centered goals
- Contribute to the development of an individualized nursing care plan

ADN
- Formulate goals with the client/patient, client's/patient's family and health care team
- Develop an individualized nursing care plan based on the nursing diagnoses

**Implementation**

PN
- Safely performs nursing interventions to meet the predictable needs of the client/patient
- Carries out nursing interventions based on the established plan of nursing care

ADN
- Implements individualized nursing interventions related to variable nursing diagnoses

**Evaluation**

PN
- Observes, reports and records client/patient responses to implemented nursing care
- Assists in evaluating outcomes of nursing interventions
ADN
• Evaluates client/patient responses to implemented nursing care and progress toward goal achievement
• Modifies nursing care plan based upon goal achievement

CAREGIVER

The caregiver role of the nurse focuses on the provision of care to clients/patients based on knowledge and skill with consideration for physical, emotional, intellectual, socio-cultural, and developmental needs. As caregiver, the nurse integrates all of the other roles and uses the nursing process to promote, maintain and/or restore the client's/patients optimal level of health. These goals are accomplished by attitudes and actions that show concern/caring for client/patient welfare and acceptance of the client/patient as a person. The caregiver also acts as a client/patient advocate by protecting human and legal rights based on the belief that client's/ patients have the right to make their own decisions about health and life.

PN
• Compares collected data to established norms
• Recognizes overt changes in client/patient status
• Carries out prescribed medical regime
• Utilizes the Nursing Process as described above
• Provides care to clients/patients who have predictable needs
• Acquires essential knowledge to provide rationale as a basis to care for clients/patients with predictable health needs

ADN
• Integrates data collected with knowledge on the etiology, development, and prognosis of client's/patient's health problems
• Recognizes covert changes in client/patient status
• Establishes priorities of care based on nursing assessment
• Collaborates with other health disciplines and community agencies to meet client/patient needs and evaluate response to care
• Utilizes the Nursing Process as described above
• Provides care to clients/patients who have variable health needs
• Acquires a breadth of knowledge to provide a basis for applying scientific principles and making sound judgments when providing care to clients/patients with variable health needs

COMMUNICATOR

The communicator role focuses on the use of interpersonal skills to develop an effective nurse-patient relationship, to execute the teaching-learning process, and to share information with other health care team members regarding client/patient needs, interventions, and responses. Verbal and non-verbal techniques are used to convey information, demonstrate acceptance, earn trust, and establish genuine regard and mutual respect.

PN
• Assist with assessment of learning needs for maintenance and restoration of optimal health or prevention of illness for the client/patient
• Implements and reinforces teaching from established plans of care
• Provides basic teaching during routine care
• Reports effectiveness of teaching to appropriate health team members
• Uses effective communication skills and interviewing techniques in the identification of predictable health needs
• Reports significant observations to appropriate health team members, records accurately
• Uses effective communication skills with members of the health team

COMMUNICATOR

ADN
• Assess learning needs for maintenance and restoration of optimal health or prevention of illness for the client/patient, client's/patient's families and/or small groups
• Plan and implement individualized teaching plans consistent with the client's/patient's, client/patient family's, and/or small group's cognitive and developmental levels and identified teaching-learning goals
• Evaluates degree of learning and effectiveness of teaching plan and modifies plans as necessary
• Reinforces teaching plans of other health team members
• Uses effective communication skills and interviewing techniques in planning care for clients/patients, client/patient families, and/or small groups with variable health needs
• Utilizes goal-directed therapeutic communication techniques with clients/patient, client/patient families, and/or small groups
• Evaluates and documents significant observations
• Practices effective communication techniques with members of the health care team
• Initiates referrals based on recognition of client's/patient's needs

MANAGER/LEADER

The nurse manages the nursing care of clients/patients, families of clients/patients, and/or small groups. The nurse-manager also delegates nursing activities to ancillary workers and other health care providers, and supervises and evaluates their performance. Managing and leading requires knowledge about organizational structure and dynamics, authority and accountability, leadership, change theory, advocacy, delegation, supervision, and evaluation.

PN

The Manager/Leader role for PN's occurs post-graduation and following work experience. The LPN Supervisory Course and applicable continuing education support these roles and responsibilities.

ADN

Manages/Leads the nursing care of clients/patients, families of clients/patients, and/or small groups.

MEMBER OF A PROFESSION

It is within the nursing educational program that professional values are developed, clarified, and internalized. Values that are basic to the delivery of quality care include a commitment to the public, a belief in the dignity and worth of each person, and the responsibility for continued professional growth.

PN and ADN

• Practices within the ethical and legal framework of nursing
• Assumes responsibility for ongoing professional development
• Demonstrates commitment to high quality in own nursing practice
• Accepts responsibility for own actions
• Recognizes individual dignity and worth

SOUTHEASTERN COMMUNITY COLLEGE
Nursing Program
PROGRAM OUTCOMES

Practical Nursing

Upon completion of the Practical Nursing program, the graduate is prepared to function as a beginning practitioner as defined by the Nurse Practice Act of Iowa.

1. Provide competent nursing care to individuals with predictable health needs, within a variety of settings, utilizing the basic skills of assessment, planning, implementation, and evaluation, under the supervision of a registered nurse or a physician.
2. Apply essential knowledge to the care of individuals with predictable health needs.
3. Communicate effectively with clients/patients, client/patient families, and members of the health care team.
4. Incorporate appropriate basic teaching when giving nursing care.
5. Practice within the ethical and legal parameters of nursing.
6. Maintain competency and advance skills by participating in ongoing professional development.
Associate Degree Nursing

Upon completion of the Associate Degree Nursing program, the graduate is prepared to function as a beginning practitioner, as defined by the Nurse Practice Act of Iowa.

1. Provide competent nursing care to individuals with variable health needs, within varied settings, utilizing the five steps of the nursing process.
2. Apply knowledge to make sound judgments when providing care to clients/patients with variable health needs.
3. Utilize goal-directed therapeutic communication techniques with clients/patients, client/patient families, and/or small groups.
4. Communicate effectively with members of the health care team.
5. Utilizing the nursing process, provide individualized teaching for clients/patients, client/patient families, and/or small groups to meet identified teaching-learning needs.
6. Manage the nursing care of clients/patients, families of clients/patients, and/or small groups.
7. Practice within the ethical and legal parameters of nursing.
8. Maintain competency and advance skills by participating in ongoing professional development.

Section II Admission Information

Administrative Guideline #317

ADMINISTRATIVE GUIDELINE TYPE: Registration and Admissions Functions
ADMINISTRATIVE GUIDELINE TITLE: Admission Criteria for Nursing Programs

DEPARTMENT RESPONSIBLE: Academic Affairs
GUIDELINE STATEMENT OF PURPOSE: Admission Criteria to Nursing Programs

I. INTRODUCTION

A. The following are criteria for admission to the Practical Nursing Diploma and Associate Degree Nursing Program. These criteria are in effect at Keokuk and West Burlington Campuses.

B. Several elements are detailed herein:

   1. Determination of the date of program eligibility for the Nursing Program.
   2. Admission criteria to the Nursing Program.
   3. Review of applications of eligible students for the Nursing Program.
   4. Assignment of student openings in the second year of the Associate Degree Nursing Program.
   5. Progression criteria for current nursing students requesting to register in the second year of the Nursing Program (Associate Degree Nursing Program).
   6. Students applying for re-entry/re-admission to the Nursing Program.
   7. Admission criteria for Associate Degree Nursing-Advanced Placement students.
   8. Transfer students.

C. Enrollment in Nursing is limited by program cap, clinical resources and faculty availability. The Dean of Health Professions and the Vice President for Academic Affairs will determine a maximum number of accepted students.

D. Operational Definitions:

   Re-entry – students requesting re-entry to the Nursing Program after one attempt at completion of either the Practical Nursing Diploma (PN) or the Associate Degree in Nursing (ADN) Program.

   Attempt – students who have failed or withdrawn from a Nursing course(s) at either level of the Nursing Program.
Re-admission – a student requesting re-admission to the Nursing Program after two attempts at completion of either the PN or the ADN level of the Nursing Program.

Program track – SCC has three program tracks: Keokuk Campus day track, West Burlington Campus day track and West Burlington Campus evening/weekend track.

Nursing Program core courses – Nursing courses listed with PNN or ADN in the course subject.

Wait list - a list of eligible students who have met admission criteria who await placement in the Nursing Program.

Advanced Placement - prospective students who are Licensed Practical Nurses entering the Associate Degree Nursing Program.

II. DETERMINATION OF THE DATE OF ELIGIBILITY FOR THE NURSING PROGRAM

The date of application to the SCC Nursing Program determines how eligible students, those meeting admission criteria, are added to the waiting list and prioritized for admission. The earliest applicants are given priority when all academic criteria are met.

A student is considered eligible when all academic requirements are met.

1. Minimum test scores as described in the admission criteria within the last 24 months.
2. Human Anatomy and Physiology I with a grade of “C” (2.0) or higher.
3. Completion of the required meeting with the Nursing Enrollment Specialist at the respective campus.

III. NURSING PROGRAM ADMISSION CRITERIA

Minimum requirements for admissions are:

1.  High school diploma, General Education Development (GED) equivalency or HiSET – High School Equivalency Test.
2.  Students must complete one of the following standardized tests and attain the minimum scores listed in the grid below:

<table>
<thead>
<tr>
<th>ACT</th>
<th>COMPASS</th>
<th>Accuplacer</th>
<th>ALEKS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Composite - 20</td>
<td>Pre-Algebra - 50</td>
<td></td>
<td>14</td>
</tr>
<tr>
<td></td>
<td>Reading - 83</td>
<td>Reading Comprehension - 73</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Writing - 62</td>
<td>Sentence Structure - 82</td>
<td></td>
</tr>
</tbody>
</table>

Standardized placement scores must be completed within 24 months at the time of review for acceptance.

3.  Successful completion of BIO-168 Human Anatomy and Physiology I and BIO-173 Human Anatomy and Physiology II with a grade of “C” (2.0) or higher (completed within the last 5 years).
4.  Completion of the required meeting with the Enrollment Specialist.

5.  Current Certification as a Nurse Aide and identified as eligible in the Iowa Direct Care Worker Registry.

IV. REVIEW OF ELIGIBLE STUDENTS FOR THE NURSING PROGRAM

1.  Admission of eligible students will occur in September and February for the next available class.
2.  Accepted students will be notified by mail.
3.  Accepted students are required to attend the mandatory Nursing Program orientation to confirm Nursing Program enrollment.
4.  Accepted students who do not attend the mandatory Nursing Program orientation will be moved to the bottom of the waiting list.
5.  Accepted students who wish to defer their Nursing enrollment to the next available start date must notify the Nursing Enrollment Specialist no later than one week prior to their scheduled start date. If the student does not notify the Nursing Enrollment Specialist, the student must re-apply and will be given a new date of application to the SCC Nursing Program.
6.  When the program is filled, eligible students will be placed on a waiting list based on the date of application to the SCC Nursing Program.
7. A waiting list will be in place for Keokuk Campus day track, West Burlington Campus day track and West Burlington Campus evening/weekend track. A student will be placed on only one waiting list.

8. Wait listed students are admitted once they have reached the top of the wait list and there is space availability.

9. Students will be allowed to continue in the Nursing Program if the following are completed within the first four weeks of the program:
   a. Completed Physical Examination Form.
   b. Clearance on criminal, dependent adult and child abuse background screening.
   d. Current certification in Mandatory Reporting: Dependent Adult/Child Abuse.
   e. Documentation of required immunizations for Healthcare Personnel.

V. ASSIGNMENT OF STUDENT OPENINGS IN THE SECOND YEAR OF THE ASSOCIATE DEGREE NURSING PROGRAM

Student openings will be filled using the following priority system:

1. First Priority: Current SCC students who are enrolled in the Nursing Program.
2. Second Priority: SCC students who are accepted for re-entry.
3. Third Priority: Licensed Practical Nurses applying to complete the Associate Degree in Nursing.

VI. PROGRESSION FROM THE PRACTICAL NURSING PROGRAM TO THE ASSOCIATE DEGREE NURSING PROGRAM

A. Students must successfully complete the Practical Nursing course work (both Nursing core courses and Arts and Sciences courses required in the Practical Nursing Diploma Program) with a grade of “C” (2.0) or higher prior to enrollment in the Associate Degree Nursing Program.

B. Students progressing to the Associate Degree Nursing Program must successfully complete Practical Nursing licensure to advance. Practical Nursing licensure is required prior to enrollment in ADN 641 (Nursing III).

Enrollment numbers are based on program cap, clinical resources and faculty availability.

VII. STUDENTS APPLYING FOR RE-ENTRY TO THE NURSING PROGRAMS

Core nursing coursework must be completed within 24 months. Students applying for re-entry must satisfy the following criteria:

1. Students may re-enter once in the Practical Nursing year and once in the Associate Degree Nursing year.
2. Re-entry must be in the following academic year in the same program campus location and track (day or evening).
3. Students who intend to re-enter must provide a letter stating the request for readmission to the Dean of Health Professions by September 1st or February 1st. The letter requesting re-entry must include:
   a. Personal reflection about the factors that interfered with their ability to complete the Nursing Program.
   b. Situations that have changed to enhance success in the Nursing Program and plans and goals to enhance success in the Nursing Program.
4. Students who are approved for re-entry into the Nursing Program are required to retake the appropriate level Pharmacology and all subsequent medical-surgical core courses and pass with a grade of “C” or higher.
5. Students who have had two unsuccessful attempts may reapply to the Nursing Program in five years.

VIII. STUDENTS APPLYING FOR RE-ADMISSION TO THE NURSING PROGRAMS

1. Students with two attempts may apply for readmission to the program five years after the last date of program attendance. Factors that may be considered include, but are not limited to: academic success, remediation activities, clinical performance, student behavior/attitudes/professionalism and attendance pattern.
2. Transcripts will be evaluated for course expiration at the time the student re-applies to the program. The student will be required to start at the beginning of the Practical Nursing or Associate Degree Nursing year, respectively.
3. Students must meet all criteria outlined in section IV.

IX. LICENSED PRACTICAL NURSE (LPN) ADMISSION INTO ASSOCIATE DEGREE (ADN) PROGRAM
Admission to Southeastern Community College, official acceptance for program enrollment, and placement on the program/class list will be granted upon successful completion of the required admission criteria and based upon program cap, clinical resources and faculty availability.

1. Current licensure in good standing as an LPN in the United States.
2. Attendance at a mandatory Nursing orientation.
3. Satisfactory completion of Practical Nursing coursework with a grade of “C” (2.0) or higher in all required courses (both Nursing core courses and Arts and Sciences courses required in the Nursing Program) prior to enrollment in the Associate Degree Nursing Program.
4. The courses listed below may be approved by the Dean of Health Professions if they have been taken within the last 5 years prior to admission to the program, have equal credit hours, and similar content:
   - BIO-168 Human Anatomy & Physiology I (4 credits)
   - BIO-173 Human Anatomy & Physiology II (4 credits)
   - BIO-186 Microbiology (4 credits)
   The Anatomy and Physiology I and II and Microbiology courses are considered valid for 10 years if the applicant has been working as an LPN.
5. Licensed Practical Nurses will be required to have clearance on criminal and dependent adult and child abuse background screening; Basic Life Support for Health Care Provider certification; completed physical examination requirements, current certification in Mandatory Reporting: Dependent Adult/Child Abuse, and documentation of required immunizations for Healthcare Personnel.
6. Accepted students will be notified by mail.

XI. TRANSFER STUDENTS

A. Current SCC students with a grade of “C” or higher who desire to transfer within the college from track to track are required to submit the request in writing and meet with the Dean of Health Professions and Nursing faculty representatives to approve transfer request.

B. Transfer students applying for Nursing Program admission, who have been enrolled in a Nursing curriculum other than SCC, will be required to meet with the Dean of Health Professions to discuss placement. Course syllabi and two letters of reference verifying the student’s good standing may be required. One letter must be from the previous program’s Dean/Director/Coordinator and the second from a current Nursing faculty from the previous Nursing Program. Transfer students are accepted based on program space availability.

IOWA CORE PERFORMANCE STANDARDS
For Health Care Career Programs

Iowa Community Colleges have developed the following Core Performance Standards for all applicants to Health Care Career Programs. These standards are based upon required abilities that are compatible with effective performance in health care careers. Applicants unable to meet the Core Performance Standards are responsible for discussing the possibility of reasonable accommodations with the designated institutional office. Before final admission into a health career program, applicants are responsible for providing medical and other documentation related to any disability and the appropriate accommodations needed to meet the Core Performance Standards. These materials must be submitted in accordance with the institution’s ADA Policy.

</table>
| Interpersonal    | Interpersonal abilities sufficient to interact appropriately with individuals, families and groups from a variety of social, emotional, cultural and intellectual backgrounds. | □ Establish rapport with patients/clients and colleagues  
□ Demonstrate high degree of patience  
□ Manage a variety of patient/client expressions (anger, fear, hostility) in a calm manner |
| Communication    | Communication abilities in English sufficient for appropriate interaction with others in verbal and written form. | □ Read, understand, write and speak English competently  
□ Explain treatment procedures  
□ Initiate health teaching  
□ Document patient/client responses  
□ Validate responses/messages with others |
| Mobility         | Ambulatory capability to sufficiently maintain a center of gravity when met with an opposing force as in lifting, supporting, and/or transferring a patient/client. | □ The ability to propel wheelchairs, stretchers, etc., alone or with assistance as available |
| Motor Skills     | Gross and fine motor abilities to provide safe and effective care and documentation. | □ Position patients/clients  
□ Reach, manipulate, and operate equipment, instruments and supplies  
□ Electronic documentation/keyboarding  
□ Lift, carry, push and pull  
□ Perform CPR |
| Hearing          | Auditory ability to monitor and assess, or document health needs.         | □ Hears monitor alarms, emergency signals, auscultatory sounds, cries for help  
□ Hears telephone interactions/dictation |
□ Discriminates color changes  
□ Accurately reads measurement on patient/client related equipment |
| Tactile          | Tactile ability sufficient for physical assessment, inclusive of size, shape, temperature and texture. | □ Performs palpation  
□ Performs functions of physical examination and/or those related to therapeutic intervention, e.g. insertion of a catheter |
| Activity Tolerance | The ability to tolerate lengthy periods of physical activity.              | □ Move quickly and/or continuously  
□ Tolerate long periods of standing and/or sitting |
| Environmental    | Ability to tolerate environmental stressors.                              | □ Adapt to rotating shifts  
□ Work with chemicals and detergents  
□ Tolerate exposure to fumes and odors  
□ Work in areas that are close and crowded  
□ Work in areas of potential physical violence |
SOUTHEASTERN COMMUNITY COLLEGE
Health Career Programs
ESSENTIAL FUNCTIONS GUIDELINES

The following essential functions have been identified as necessary abilities for participation in the Health Programs at Southeastern Community College.

1. Must be able to maintain balance from any position.
2. Must be able to lift at least 40 pounds.
3. Must be able to hear high and low frequency sounds produced by the body and environment. (Example: heart sounds, telephone, and transcribing)
4. Must be able to visibly detect changes in or around patients.
5. Must be able to feel body changes and vibrations. (Example: palpate pulse, intercostal spaces, and veins).
6. Must be able to smell body and environmental odors. (Example: electrical equipment burning or infected wounds).
7. Must be able to coordinate eye and hand movements. (Example: releasing a blood pressure cuff valve while observing the blood pressure gauge, focusing microscopes, and word processing)
8. Must be able to coordinate fine and gross motor movements with hands. (Example: able to give injections and perform phlebotomy).
9. Must be able to see different color spectrums. (Example: bright red drainage as opposed to serous drainage, distinguish positive and negative urinalysis reactions).
10. Must be able to comprehend readings and write legibly when documenting notes on patients' records.
11. Must be able to send familiar message(s) to the receiver and interpret the feedback appropriately. (Example: receiving telephone orders from a physician or obtaining history from a patient).
12. Must be able to correctly perform simple mathematical computations for administering drugs (without the use of a calculator) and bookkeeping.
13. Must be able to demonstrate a mentally healthy attitude which is age-appropriate and congruent with the local and cultural norms.
14. Must be able to input/output data using the computer.
15. Must be able to perform all aspects of cardiopulmonary resuscitation (CPR).
16. Must be able to move quickly throughout the clinical site.

The instructor reserves the right to amend and augment this listing if, in his/her professional judgment, the safety of the student or of others in the instructional setting is in jeopardy.

Every effort is made to create a learning environment similar to the actual workplace. However, Southeastern Community College cannot predict the essential functions as identified by various employers. The skills identified on this essential functions form are those which the program feels are necessary for participation in the program. No representation regarding industry standard is implied.
READ AND SIGN ONE OF THE FOLLOWING STATEMENTS.

1. These essential functions were explained to me and I certify, to the best of my knowledge, that I have the ability to perform these functions.

Section III  Program Policies and Procedures

Southeastern Community College Health Career Programs Ethical and Professional Conduct

Southeastern Community College Health Career Program faculty expects students to comply with standards of ethical and professional conduct. Enrollment of a student in the Medical Assisting, Respiratory Therapy, Nursing, Emergency Medical Services and Health Career Continuing Education programs constitutes student agreement to comply with the standards. All members of this academic community are responsible for the academic and professional integrity of the program. Students must demonstrate such integrity at all times in completing classroom assignments, in taking examinations, in performing patient obligations and in dealing with others. It is also the responsibility of students to report acts of academic dishonesty and professional misconduct to faculty or to school administration.

Ethical and professional conduct means that the student will demonstrate the following:

1. Is truthful.
2. Keep commitments with clients, families, instructors and colleagues.
3. Demonstrates respect for the dignity and rights of others regardless of race, religion, sex, age or nationality.
4. Assumes responsibility for actively participating in the learning process for self.
5. Requests supervision/guidance appropriately.
6. Adheres to policies and procedures of cooperating agencies.
7. Adheres to SCC policies and procedures.
8. Uses principles of safe practice when caring for clients.
9. Demonstrates preparedness for assignments.
10. Demonstrates attempts to alter behavior based on constructive criticism.
11. Maintains confidentiality.

DISCIPLINARY POLICY

1. General Policy. Certain behaviors, academic and non-academic, are considered unacceptable by the Health Career Programs and are grounds for disciplinary action.

2. Forms of Disciplinary Action. There are four general forms of disciplinary action: written warning, disciplinary probation, suspension and termination. However, these forms of disciplinary action may be imposed in combination and special conditions may be imposed in addition to them. For a relatively minor offense, a student shall receive a written warning for the first offense, a disciplinary probation for the second offense, suspension on the third offense and termination on the fourth offense. Students should be aware, however, that some behaviors are so unacceptable as to warrant immediate disciplinary probation, suspension or termination.

3. Grounds for Disciplinary Action. The Health Career Programs have determined that the following inappropriate behaviors are grounds for disciplinary action. This is not an inclusive list of inappropriate behavior and is intended only as a guideline. Additionally, the consequences imposed for inappropriate behavior shall be at the discretion of the administration. Disciplinary action will be decided on a case by case basis.

Written Warning:
- Insubordination.
- Unsafe clinical practice.
- Any violation of the Ethical and Professional Conduct Policy.
- Unsafe action in the classroom.
- Use of tobacco products in unauthorized areas.
- Unauthorized possession or use of property belonging to Southeastern Community College, clinical education/field settings, clients, employees or peers.
- Continued poor grooming or poor hygiene.

Disciplinary Probation:
- Cheating.
- Plagiarism.
• Falsifying reports.
• Falsifying records.
• Breach of confidentiality.
• Any repeated behavior for which a written warning was previously issued.
• Unsafe clinical/field practice.
• Unsafe action in the school/classroom.
• Unjust or unprofessional gossip, criticism or discourtesy, which contributes toward reducing morale of peers.
• Unjust or unprofessional gossip, criticism or discourtesy, which affects clients, visitors, peers or educators (including guest speakers).

Suspension:
• Chemical or emotional impairment.
• Unsafe clinical/field practice.
• Any inappropriate behavior during or following disciplinary probation.
• Fighting or attempting bodily injury to anyone on school or clinical premises.
• Use of abusive or threatening language.
• Unsafe action in the school, classroom or clinical education sites.
• Unauthorized removal of property belonging to SCC, clinical/field education sites, clients, families, employees or peers.
• Willfully damaging, destroying, defacing or wasting property or supplies of SCC, clinical education sites, clients, families, employees or peers.
• Sexual harassment of clients, visitors, families, employees or peers.

Termination:
• Unlawful possession, use, or distribution of narcotics or other controlled substances.
• Unlawful possession, use or distribution of alcohol on SCC premises or at School activities.
• Abuse of clients.
• Conviction of any crime involving illegal drugs, child or elder abuse, or other actions incompatible with professional practice.
• Unauthorized possession of firearms, explosives or other weapons.
• Repeated violation of Rules or Policies of SCC.
• Any repeated behavior during or following suspension.
• Willfully submitting false information or willfully withholding information for the purpose of obtaining or maintaining enrollment.
• Conviction of a felony while enrolled.

4. Documentation and Reporting.

a. Written Warning. A written warning shall include a description of the unacceptable behavior, a delineation of acceptable behaviors for similar situations and an explanation of the consequences should the unacceptable behavior occur again. Any member of the Health Career Faculty may issue a written warning. The student shall receive a copy of the written warning using the appropriate form and forwarding the written warning to the Nursing Program Coordinator. This form will be placed in the student’s file. Upon graduation, the written warning shall be removed from the student’s file.

b. Disciplinary Probation. Disciplinary probation is a written agreement between the Administration and the student. It specifies the unacceptable behavior(s) or type(s) of behavior, explicitly delineates behavior necessary in order to continue in the program and the consequences should the student fail to comply. The student, Administration, and a witness shall sign this written agreement. A copy of the agreement shall be delivered to each party and the original Disciplinary Probation agreement shall be placed in the student’s file. The agreement shall be removed from the student’s file upon graduation.

c. Suspension. Suspension is the temporary dismissal of a student from nursing (or other) coursework and/or clinical activities. No credit will be given for missed coursework even if this results in failure of the course. It is also possible that suspension could result in an inability to complete the course unless it is repeated at a later time. A statement from Administration regarding the grounds for suspension shall be written on the suspension form and
shall be placed in the student’s file. The suspension statement will be removed from the student’s file upon graduation. Following suspension and upon satisfactory completion of any requirements or conditions imposed, the student may continue in the program. However, readmission will be contingent on completion of prerequisite requirements and space availability in the course desired.

d. **Termination.** Termination is the immediate and permanent dismissal of a student from the program. A terminated student shall not be permitted to complete current course objectives, to continue to the next specified course or to finish the program. A statement by Administration regarding the grounds for the termination shall be documented and placed in the student’s permanent record. A terminated student shall complete an exit interview with Administration. The student to complete business transactions with SCC will complete a student withdrawal slip from the college.

e. **Faculty Documentation.** In the event that special evaluation of a student is required, the instructor must provide verbal and written feedback. The student must sign the evaluation to confirm that the evaluation has been read. The student may make comment on the written evaluation. The student must be informed that the evaluation becomes a part of the student file. Date any contracts with the student regarding the situation under question and, if appropriate, give written follow-up outlining the action to be taken.

5. **Imposition of Disciplinary Action.** Any member of the Health Career Faculty may issue a written warning to any student. Disciplinary probation, suspension or termination shall be imposed at the discretion of Administration and is subject to any rights of appeal.

6. **Disciplinary Investigation and Determination.** Preceding imposition of any disciplinary action other than a written warning, the student shall be notified of the problem by Health Career Faculty or by Administration. The student shall meet with Administration and shall have an opportunity to respond to any accusations. Administration shall investigate the accusations and request input from appropriate parties. Administration shall determine the form of disciplinary action. The student shall be informed in person by Administration of the determination, the reasons warranting the action and the conditions, if any, under which the student will be allowed to proceed with the program.

7. **Referral for Treatment.** In conjunction with disciplinary action, administration may require that the student be examined for chemical dependency or some other physical or mental impairment. Related requirements, which may be imposed upon the student, may include:
   a. a health evaluation
   b. completion of any treatment/rehabilitation recommendation.
   c. signed release of information by the student to SCC Health Career Director or designee.

As appropriate, the student shall be removed from clinical/field activities during evaluation and/or treatment periods. The student’s participation in or completion of a treatment or rehabilitation program alone shall not qualify the student for reinstatement to clinical or classroom activities or to the program. The student’s continuation in the program depends entirely upon the severity of the infraction for which disciplinary action is imposed and the student’s compliance with that disciplinary action.

Health Career Program students maintain the right to appeal decisions which are guided by this policy through the Judicial Codes and Appeals process of Southeastern Community College.
The following system is used by instructors to report theory grades to students and for recording on transcripts:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Meaning</th>
<th>Grade Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>

</tr>
</tbody>
</table>

Please refer to the section on academic standards in the SCC Credit Course catalog.

**Nursing Theory**

Percentage grades used in the nursing program for theory grading:

- A 92-100
- B 85-91.99
- C 80-84.99 (80% required to pass course)
- D 70-79.99
- F 69.99 or below

Students will be provided with a written outline of the point distribution for each nursing course at the beginning of the term.

In nursing courses with a clinical component, a minimum of 90% of the theory points will be based upon objective examinations.

A comprehensive final will be administered at the end of each course with a clinical component. The comprehensive final will count as 20% of the theory grade.

**Clinical Evaluations**

Clinical evaluation guidelines will be provided for students prior to each clinical experience. Clinical evaluation is awarded on a satisfactory/unsatisfactory basis. The final clinical evaluation must be satisfactory in all areas to successfully pass the course.

Successful completion of theory and clinical is required to progress in the nursing curriculum. Successful completion is defined as 80% in theory and a grade of satisfactory in clinical. An unsuccessful grade in clinical will result in the grade of F.

Southeastern Community College Health Career Programs Academic Achievement Procedure

A student who drops below an 82% in theory or is having difficulty meeting clinical competencies may be experiencing academic difficulty. Academic difficulty exists when, in an instructor’s judgment, a student is experiencing difficulty achieving or maintaining a passing theory grade and/or satisfactory clinical performance. Once academic difficulty has been identified, the student, faculty and/or administration will develop an "Academic Achievement Plan."

1. The instructor initiates a meeting with the student to discuss academic difficulty.
2. The student and instructor work together to evaluate the nature of the difficulties.
   a. Determine if the student is having nonacademic problems that are interfering with academic achievement (i.e., finances, family, personal problems). The instructor may make a referral to an appropriate resource or the instructor can request assistance from the program coordinator.
   b. Determine if the difficulty is in theory, assess the student’s level of comfort and ability with skills related to:
      - class notes
      - completion of assignments
      - participation in class
      - study habits and/or testing
c. Determine if the difficulty is in clinical or field practice, specify the clinical competency not being met and the behaviors/skills/knowledge needed to satisfactorily meet the competency. The instructor should make related recommendations regarding:

- methods of preparation
- written assignments
- supervised practice in a laboratory setting
- other, as indicated by the specific nature of the student's difficulty

3. The "Academic Achievement Plan" should be completed and one copy distributed to each of the following:
   a. Student
   b. Program Coordinator/Director/Dean

4. The student is responsible for actively participating in the academic plan and for keeping scheduled appointments with faculty.

5. The "Evaluation/Follow-Up" section of the form should be completed at the appropriate time and a copy placed in the student's program file.

6. If academic difficulty persists, the Dean of Health Professions will contact the student for additional follow-up.

---

**SOUTHEASTERN COMMUNITY COLLEGE**

**Nursing Program Testing Policy and Testing Security Procedures**

The SCC Nursing Program Testing Policy and Procedure is intended to serve as a model for the delivery of quality tests and testing environment. The guidelines are intended to provide helpful information to testers. These standards and guidelines have important benefits for all involved in the testing process.

**Purpose:** To promote high quality testing operations and uphold ethical practices.

**Objectives**

- Inform and promote quality test administration for enrolled students
- Provide standard testing criteria and to align best practices and procedures
- Raise awareness of the importance of appropriate testing conditions and procedures for standardized testing
- To maintain a distraction-reduced testing environment
- To ensure the security of test materials
- To offer the best opportunity for students to demonstrate their knowledge, skills and abilities
- To enhance the opportunity for student nurse professionalism
- To prepare the student for national licensure examinations

**Testing Standards**

- The use of paper-based testing (PBT) and computer-based testing (CBT) are acceptable
- Adequate physical testing facilities will be provided which comply with the American Disabilities Act (ADA)
- Test integrity will be protected by following appropriate exam handling and storage procedures
- Test integrity will be protected by ensuring active proctoring
- Protect the confidentiality and rights of privacy of examinees as defined by FERPA and SCC policies and guidelines
- Examinees will be treated in a fair, courteous, professional and non-discriminatory manner
- Responses to examinee concerns will be with respect while maintaining the integrity of the test
- Referrals to Success Advocates will be to provide students appropriate SCC resources
- Evaluation of tests will be on-going and completed in a comprehensive manner

**Testing Procedures**

1. Examinations will be administered at the beginning of a scheduled class session or testing session.
2. Instructors will verify and record attendance at the beginning of the testing session.
3. Students will be seated randomly or by arranged seating chart. Seating arrangements may be changed at the discretion of the instructor. Seating will be arranged to limit the view of other examinees tests and to facilitate proctoring.
4. Students will not be allowed to sit for the exam until all personal belongings are stowed in the designated area. No hats, coats, scarves or gloves will be allowed on chairs or tabletops at the testing station or desk. Books, bags, purses, paper, etc. and all other materials will all be stowed in the area designated by the instructor. All electronic devices are required to be off/muted and stowed in the designated area.

5. Students are not allowed to wear any head gear or large accessories. (No caps, hats, hoodies or scarves). Provisions will be made for specific religious/cultural apparel.

6. Any large jewelry or accessories will not be allowed during testing. No sunglasses may be worn during the testing session.

7. Ear plugs may be used with instructor approval.

8. Students are to be aware of their body language and to sit up straight and face forward. Feet are to be kept on the floor at all times. Shoes are to remain on during testing. Hands are to be visible at all times. Long hair shall be pulled back. No playing with hair during a testing session.

9. Testing stations or desktops must be completely clear. No food or drinks are permitted during the testing session. No gum chewing is permitted.

10. Students will be issued a stand-alone calculator. No personal calculators or devices may be used.

11. Students will be issued scratch paper by the instructor. No writing on the scratch paper may be done until the exam officially begins. Your name must be written on the scratch paper and submitted at exam completion. Scratch paper will be reconciled.

12. Test instructions will be read clearly and verbatim.

13. Testing sessions are timed. No additional time will be allocated beyond the scheduled testing session.

14. No questions may be asked during the testing session.

15. Test questions are not to be discussed following the test.

16. Students are to leave the testing session quietly once the test is complete and re-enter when class resumes or as indicated.

**Paper-Based Testing**

Paper-based tests will be numbered and reconciled prior to each examination. The instructor will distribute the test form to each student. Students may open the examination packet when directed to do so by the instructor. The student will sign in on the numbered testing record when the exam is completed. When all tests and test materials are submitted they will be reconciled.

A Scantron answer form is needed for paper-based testing. One Scantron may be on the testing surface during the testing session. Extra Scantrons or Scantron packs must be stowed during the testing session.

When Scantrons are utilized for test responses the Scantron is the prevailing document. Only answers on the Scantron will be accepted. Answers written on the test but not transferred to the Scantron are invalid.

**Computer-Based Testing**

Students will be seated randomly or by arranged seating chart by the instructor. The number of the computer used is to be placed on the testing scratch paper. During computerized testing a student may not log on to another site or open another screen during the examination. No printing is permitted during the testing session. When the test is complete you are required to submit the exam, log off of eCollege and fully log off the computer.

**Special Circumstances**

Testing breaks or interruptions are not permitted. In the case of an emergency or a need to leave the testing session before completion of the exam, an escort will be required or your test may be invalidated. The student will be allowed to resume or complete the test at the discretion of the faculty.

Students absent on a test date will have a proctored exam in a secure testing environment at the discretion of the faculty. A proctored exam may include the use of electronic surveillance methods.

**Test Reviews**
Test reviews are considered a privilege and will be conducted at scheduled times at the discretion of the instructor. Tests and test results are the property of the college and will be handled with test integrity and security best practices. Test reviews are designed for developing critical thinking opportunities. Students are to refrain from discussing the exam content with peers until the exam review where questions and concerns can be addressed. Inquiries from nursing students are to be professional in nature. No test reviews will be conducted on final examinations.

Test Banks

The use of test banks is not allowed and/or the misuse of internet resources as it pertains to the utilization of test banks. Publishers face the problem of illicit sales of copyrighted textbooks and test banks on the internet. These sales constitute illegal copyright infringement and are punishable by law.

Elsevier (SCC’s textbook publisher for nursing program texts) takes all copyright infringement seriously. For example, they retain an outside expert to actively monitor the web for piracy, and take appropriate measures. Additionally, Elsevier’s legal counsel takes action when piracy recurs. Elsevier is also partnered with the Software and Information Industry Association (SIIA) to use automated tools to identify improper offerings and to identify recurring sellers.

SCC is committed to protecting the security of test banks. Students, in particular, may not understand the consequences of purchasing or utilizing fraudulent test banks. Further, students who violate the school’s academic honesty policies by purchasing or utilizing test banks on the internet not only place their education in jeopardy, but they also risk disqualification from professional licensure due to ethics violations. An attempt by anyone to use, sell or purchase test banks from a publisher can result in serious consequences.

The Southeastern Community College Health Career Program Ethical and Professional Conduct Policy will be enforced to the fullest extent as it pertains to the misuse of test banks.

Ethics Statement

If the testing guidelines are not followed or the student is suspected of cheating or tampering with PBT or CBT or engaging in any irregular or unusual behavior (including disclosure of examination content-tangible or intangible) the student will be required to surrender your test and any suspected test preparation or study materials. The test will be invalidated.

This policy is written with standards and guidelines from the National College Testing Association and the National Council State Boards of Nursing, Inc.

Revised May 2017

RATIO OF INSTRUCTOR TO STUDENT POLICY

The ratio of nursing faculty to students in the clinical area is determined by Iowa Board of Nursing Administrative Rules. When students are involved in direct client care, the rules outline a ratio of one instructor to a maximum of eight students. When students are observing care and providing no direct client care, this ratio does not apply. Clinical Instructors will not exceed the ratio of 1:8 students.

PRECEPTOR EXPERIENCE

The SCC preceptor experience is an offering in the ADN 642 course. The preceptor education model is an opportunity for professional growth in the student nurse role within the health care facility setting. The preceptor education model is one student nurse learner to one nurse preceptor.

The student must be enrolled in ADN 642 in good standing and meet the following criteria:

1. The student must have a grade of 82% or greater in ADN 641 and ADN 642 and have a satisfactory grade status in clinical evaluations.
2. The student will have no violations of the Ethical and Professional Conduct standards.
Interested applicants must submit a professional letter of interest to the Nursing Faculty by the appropriate course deadline date. The letters will be reviewed with the following qualification considerations:

a. professionalism
b. therapeutic communication skills
c. promptness and attendance
d. self-motivation in learning in the class and clinical areas
e. safe clinical practice
f. suitability for learning in the independent preceptor-student model

Preceptor experiences are based upon the number of sites and preceptor availability.

Faculty will select candidates based upon the above criteria.

If the number of applicants exceeds the number of preceptor opportunities available and as a result is more competitive; applicants may be required to submit additional documents, reference letters and/or meet a higher minimum grade requirement to qualify.

**ATTENDANCE REQUIREMENTS-SCC ADMINISTRATIVE GUIDELINE**

Southeastern Community College feels that classroom attendance is a very important factor toward successful completion of college work. Although the responsibility for attending classes rests with the student, it should be understood that a student is expected to attend class in order to maximize the benefit of enrollment in the College.

Attendance records will be taken and recorded for every class meeting. Instructors are responsible for developing and implementing their own system and forms for recording class attendance which may be checked and verified by sources from both on and off campus. These include, but are not limited to, SCC Student Services personnel, the Veteran’s Administration, federal, state, county and private human services agencies, and scholarship granting organizations. Financial aid awards are based on enrollment status. Awards may be reduced for classes that are never attended.

Each instructor is given the opportunity to establish criteria and standards of achievement necessary to earn a specific academic grade. These criteria should include a statement of the instructor’s attendance policy to be given to each class member at the beginning of the session.

This policy is subject to the limitations of the Family Educational Rights and Privacy Act.
ATTENDANCE POLICY-NURSING PROGRAM

1. Attendance and participation in all scheduled activities is necessary to meet the objectives of the nursing program. It is the expectation that students enrolled in the nursing program will attend all scheduled learning activities which includes classroom, lab, clinical and simulation. Students must be accountable for classroom material, examinations and clinical experiences missed due to absence or tardiness. Attendance is recorded daily.

2. If an absence is necessary:
   a. All clinical and classroom absences must be reported to the instructor at least one hour prior to the beginning of the learning activity.
   b. Disciplinary action will be initiated if no notification is given at least one hour prior to clinical or classroom sessions.
   c. Excesses of classroom absence or tardiness (3) will result in disciplinary action.

      The student will be responsible for initiating contact with the instructor about a missed examination. The scheduling of the missed examination will be at the discretion of the instructor.

   d. Refer to course syllabi regarding late assignments and late tests.

3. The Academic Achievement Procedure and Disciplinary Process will be initiated for those students who have repeated absence or tardiness.

4. A clinical absence is defined as any portion of a clinical day, clinical conference session/day, or lab session/day exceeding ten minutes. A clinical absence is incurred when clinical, clinical conference or a lab session is missed. To effectively build essential clinical nursing skills lab attendance is mandatory. Competency in essential nursing clinical skills is required for satisfactory passing of the course.

5. Tardiness/leaving early is not acceptable in the classroom, clinical area or laboratory sessions. Instructors will initiate disciplinary action.

6. Students may incur one clinical absence per semester without penalty. If a second absence occurs the student will be required to complete one clinical make-up day of equivalent clinical hours. The clinical make-up time will be scheduled at the end of the semester to complete the course. No other clinical absences are permitted. Students that exceed the second clinical absence will be required to meet with the Director of Nursing/Dean and withdraw from the nursing program.

   Individual cases with extenuating circumstances will be reviewed by the Nursing Faculty, Nursing Program Coordinator/Director and Dean of Health Professions.

7. A student who is absent for health reasons may be required to provide a written release from his/her health care provider before returning to a clinical site. Health policies of participating agencies will be followed.

8. Students not in attendance may not earn points awarded during in-class learning activities or quizzes.

9. Students not in attendance will be accountable for initiating communication with the instructor regarding homework assignments and clarification of due dates.

Please note: When requested, attendance information will be provided on employment references.

Revised August, 2017
I. General Information

A. Students will administer medications to assigned clients during clinical hours at the discretion of the clinical instructor.

   1. PN students may administer medications only with direct instructor supervision. The instructor is responsible for communication with unit nursing personnel and students regarding medication administration.

   2. Due to the scope of practice of the Registered Nurse, ADN students are expected to become more independent and responsible for administration of medications. The instructor determines the level of supervision required prior to administration of all medications.

B. Students are required to notify the instructor of the need for STAT or PRN medications.

C. Students at the PN and ADN level must verify all medications with physician orders.

D. Students MUST NOT administer medications prepared by another nurse under any circumstances.

E. Students must complete assigned medication research, including generic name, trade name, classification, mechanism of action, dosage, side effects and nursing implications. Instructors will clarify essential information required and evaluate student knowledge base prior to medication administration.

F. Students are responsible for charting all medications given immediately after administration. Charting medications prior to administration is a violation of the nurse practice act and the Ethical and Professional Conduct Policy of the program.

   Medication errors will be documented according to agency policy. All medication errors must be reported to the instructor immediately.

G. Medications not dispensed as unit dose must have clinical instructor or Registered Nurse verification for correct medication and dosage prior to administration.

II. Controlled Substances

A. Students are required to have instructor approval before administering controlled substances.

B. Controlled/scheduled substances administration and disposal will follow the agency guideline.

III. Intravenous Therapy/Fluid Balance

A. PN students may only discontinue peripheral IV therapy with direct instructor supervision.

B. PN students may change (hang) peripheral IV solutions without additives or medications with direct supervision of the instructor or assigned nurse.

C. PN students may administer a prefilled heparin or saline syringe flush, prepackaged by the manufacturer or premixed and labeled by a registered pharmacist or registered nurse, to an established peripheral lock, in a licensed hospital, a nursing facility or a certified end-stage renal dialysis unit with direct supervision.

D. PN and ADN students are required to verify all intravenous solutions and rates with the physician order.
E. ADN students are required to have direct instructor or designated RN supervision when administering IV medication.

F. ADN students are required to have instructor or designated RN supervision when initiating IV therapy.

**ELECTRONIC COMMUNICATION POLICY**

Electronic devices cannot be used in class or clinical without permission of the instructor.

Cellular phones are to be turned off during class or clinical. If an emergency situation arises, cellular phones may be used if permitted by the instructor.

Students are responsible for the equipment and their proper usage.

Use of social networking sites to discuss any aspect of clinical care is a breach of confidentiality and constitutes a HIPAA violation.

Use of electronic devices, social networking sites, blogs, etc., for communication that violates the ethical and professional code of conduct and constitutes unjust or unprofessional gossip, criticism, or discourtesy that affects peer, educator, or clients/families will be subject to disciplinary action up to and including termination from the nursing program.
As a student of the Nursing Program of Southeastern Community College, I will receive information and have access to medical records concerning assigned clients. Federal and State law forbids me from disclosing any information about a client to any other party including family or other health care workers. I agree to participate in education provided by the Nursing Program outlining the responsibilities of HIPAA legislation and to abide by the guidelines. I understand that violations may result in fines and/or imprisonment.

I understand that a breach of confidentiality will result in disciplinary action up to and including termination from the program. Further, I understand that I may be subject to other legal action if I breach confidentiality.

As a student, I agree to honor the confidentiality of all clients. I also agree to comply with all rules, policies and guidelines established to protect confidentiality by the facilities in which I have clinical assignments.

Student Signature
________________________________________________________________________

Date ________________________________
STUDENT NURSE UNIFORM AND EQUIPMENT GUIDELINES

As a student you represent Southeastern Community College and the professional image of nursing. Students are required to be well groomed and dressed to reflect professional nursing. Student appearance must comply with the SCC nursing program standards and the clinical agency dress codes. Students may be dismissed from the clinical site based upon inappropriate dress. Student identification must be visible at all times in the appropriate chest area.

Student uniforms must be fitted and purchased through the SCC Bookstore.

Women

Uniforms

- Two uniforms required - gray scrubs/white warm up jacket (a white skirt may be worn if preferred)

Socks/Hosiery

- All white socks with no pattern or logo may be worn with scrub pants. Socks should be mid-calf or above. No footies or short socks.
- White hose required with skirt

Shoes

- All white leather or leather-like shoe with no open toes or heels
- Must provide support and must be clean

Lab Coat

- White SCC lab jacket

Maternity Uniform

- Must work directly with the SCC Bookstore or a Nursing Faculty member to order a maternity uniform
- Must conform to traditional student uniform

Photo

- Required
- Must be visible at all times and worn above the waist

Men

Uniforms

- Two uniforms required - gray scrubs/white warm up jacket
- White crewneck undershirt must be worn under scrub top

Socks

- All white socks with no design or logo
- Socks should be mid-calf or above. No footies or short socks.

Shoes

- All white leather or leather-like shoe with no open toes or heels
- Must provide support and must be clean

Lab Coat

- White SCC lab jacket

Photo ID

- Required
- Must be visible at all times and worn above the waist
Hair

All hair must be clean and well controlled so that it does not interfere with patient care.

Students must have human colored hair. Extreme looks such as multiple colors, extremes in bleaching, dyeing or tinting are not acceptable. Hair must be clean and pulled back from face so as to not fall forward while giving patient care.

Beards and moustaches must be kept neatly trimmed and controlled.

No hair ornaments allowed other than small barrettes of white, tortoise or same as hair color

Tattoos

Tattoos are not allowed. Students must make every effort to cover and conceal visible tattoos when in the clinical area.

Jewelry

If ears are pierced, the student may wear one single pair of small post earrings (small gold, silver or pearl posts are preferred); one in each earlobe only.

No other visible piercings are allowed

No other visible jewelry is allowed except wrist watch and wedding rings

Undergarments

▪ Should be not be seen through uniform

Fragrance/Cologne

Do not wear perfume, cologne or aftershave.

Cosmetics

Cosmetics, if worn, should be used in moderation and reflect a professional image.

Nails

Fingernails should be clean and well-trimmed. No false fingernails allowed. A clear nail polish may be worn.

Lab Coat

The student shall wear the complete student scrub uniform and lab jacket with name tag while in the clinical area. Your clinical instructor will designate if other clinical apparel is required.

Personal Cleanliness

Students will maintain a high level of personal hygiene. A students breath and clothing/clinical attire must not have any detectable offensive odor. Smoking is prohibited on campus and at all clinical sites. Students cannot smell of smoke. Wearing the clinical uniform/shoes outside of the clinical area is prohibited for health and sanitation purposes.

Required Equipment

The following equipment is required for participation in clinical and should be carried at all times in the clinical setting.

▪ Watch with second hand measurement (plain face)
▪ Bandage scissors
▪ Stethoscope
▪ Penlight/non-LED
▪ Black pen
▪ Supplies as indicated for specific courses or clinical area
HEALTH POLICIES STUDENT HEALTH POLICY

Physical Examination
Students must have a physical exam completed prior to starting the nursing program. Students will be expected to update the physical examination form every 24 months. Medical clearance is also required following a major illness or surgery.

Pregnancy
A student who is pregnant should self-report and provide written clearance or documentation of any restrictions from their health care provider. Following delivery and prior to returning to class or clinical, the student must provide documentation of medical clearance to safely continue participation in the nursing program. Maternity leaves can be arranged only within the guidelines of the attendance policy.

Tuberculin Skin Test
A TB skin test (Mantoux Skin test) must be completed before initial enrollment. A student who has a negative skin test must verify a negative Mantoux Skin Test within the past twelve months or repeat the skin test during the one to three week period following the first test (two-step process).

Any student with a positive skin test is required to follow-up with a health care provider. In addition, a student must provide a written release from the provider to participate in classes or clinical.

Healthcare Personnel Vaccine Requirements

Tetanus/Diphtheria/Pertussis
All healthcare personnel who have not or are unsure if they have previously received a dose of Tdap should receive a dose. All healthcare personnel should receive a booster which must be documented within the last 10 years.

Measles, Mumps, Rubella (MMR)
Health care providers should be immune to measles, mumps and rubella. Students must have documentation of appropriate vaccination against measles, mumps and rubella with two specific dose dates.

Healthcare providers without two documented doses of MMR must provide evidence of serological blood tests documenting immunity. If the blood titer is insufficient, the student may need to receive a booster MMR.

Varicella
It is recommended that health care providers be immune to varicella. The student should have evidence of immunity with two specific doses dates of varicella vaccine or provide evidence of serological blood tests documenting immunity or verification of history of varicella (chicken pox) or herpes zoster (shingles).

Hepatitis B
It is recommended that health care providers receive the Hepatitis B vaccine series for their own protection due to the possibility of exposure to blood or bodily fluids. Health care providers should receive a 3-dose series of Hepatitis B vaccine at 0, 1 and 6 months. For health care providers with no documentation of a complete 3-dose HepB vaccine series the student must provide evidence of serological blood tests documenting immunity

As a student if the Hep B vaccine series is declined a consent/waiver form must be signed which indicates the student's intention of not receiving this vaccine.

Influenza Vaccine
All health care providers are required to receive annual vaccination against influenza (flu).

These documents must be in the student's file together with the completed health form before the student will be permitted to participate in any clinical experience.
BLOODBORNE PATHOGEN EXPOSURE GUIDELINES FOR HEALTH PROGRAM STUDENTS

Students may be participating in activities within the Health Programs (Nursing, Medical Assistant, and Respiratory Therapy) which have potential for exposure to infectious diseases including but not limited to Hepatitis B and HIV. All measures must be exercised to minimize the risk. Students who fail to comply, thereby jeopardizing the safety of others or themselves, may be asked to withdraw from their respective program.

In the event of an exposure to blood and/or body fluids (e.g. an occupational incident involving eye, mouth, other mucous membrane, non-intact skin, or parenteral contact), the student must report the incident immediately to the instructor or clinical supervisor and file an incident report for the college.

Follow-up evaluation will be required consistent with Federal regulations. This may involve going to their personal physician or the emergency room. Students are responsible for the cost of their own medical care.

**Hepatitis B**

It is highly recommended that all Health Program students providing direct patient care receive immunization against Hepatitis B. Although this is not required, it is highly recommended. Students are particularly vulnerable to contamination as their hand skills generally are not yet well developed. Although the incidence of the infection is relatively low, the outcome can be fatal. Since there is a vaccine available, all health care providers who are at risk are encouraged to become immunized.

**The Disease**

Health care professionals are at increased risk of contracting Hepatitis B infection. Hepatitis B is usually spread by contact with infected blood or blood products. The risk of acquiring Hepatitis B increases with the frequency of blood contact. Hepatitis B virus may also be found in other body fluids, such as urine, tears, semen, vaginal secretions and breast milk. Hepatitis B infection can have severe consequences, including progressive liver damage and the possibility of developing hepatocellular carcinoma. Six to ten percent of the people who contract the virus become chronic carriers.

**The Vaccine**

Vaccination is the only available means of protection against Hepatitis B. Full immunization requires three doses of the vaccine over a six month period. Because of the long incubation period for Hepatitis B, it is possible for unrecognized infection to be present at the time the vaccine is given, and in that case, the vaccine would not prevent development of clinical hepatitis.

**Procedures**

You will need your health care provider’s approval or order prior to being immunized. He or she will provide you with information regarding the contraindications and side effects of the vaccine. Contact your provider for additional information.

**Education**

As part of the curriculum all students in Health Career Programs receive instruction regarding Hepatitis B and HIV essential to providing assigned patient care. This shall include but not be limited to:

1. epidemiology
2. method of transmission
3. universal blood and body fluid precautions
4. types of protective clothing and equipment
5. work practices appropriate to the skills they will perform
6. location of appropriate clothing and equipment
7. how to properly use, handle, and dispose of contaminated articles
8. action to be taken in the event of spills or personal exposure
9. appropriate confidentiality and reporting requirements
Post Exposure Procedure for Health Career Program Students

1. If a student has been exposed to a parenteral contaminant (needle stick or cut) or superficially through a mucous membrane (eye or mouth) they are to follow the following procedure: a. inform instructor of incident immediately
   b. immediately wash the affected area with the appropriate solution (soap and water, alcohol, or water - depending upon contact area)
   c. student: seek immediate medical attention through agency policy (students are responsible for their own medical care and cost). This may include baseline testing for HIV antibody at this time, followed by recommended series of testing. (Physicians may also inquire about the student’s status in regard to tetanus and hepatitis immunization at this time.)
   d. source individual: follow institutional (agency) policy regarding determining HIV and hepatitis status of patient, (students may be responsible for the cost of any testing)
   e. maintain confidentiality of patient
   f. seek appropriate counseling regarding risk of infection
   g. complete occurrence report; obtain copy for student’s file on campus.

Universal Guidelines for Health Career Program Students

1. The Center for Disease Control has specific guidelines for health care workers which are revised periodically. They have been incorporated into these policies and are reviewed annually.
2. There shall be no routine serological testing or monitoring of students for Hepatitis B or HIV infection.
3. Barrier or universal blood and body fluid precautions are to be used routinely for all patients. These include:
   a. The use of glove(s) when:
      1) cleaning rectal and genital areas;
      2) carrying soiled linen;
      3) bathing patients, if the student has a cut/open lesion on the hand;
      4) suctioning or irrigating even if the orifice does not require sterile technique;
      5) there is, at any time, a possibility of spillage of blood or body fluid onto the student’s hands, (i.e. accucheck, discontinuing an I.V., I.M.s, Venipuncture, dressing changes, etc.) regardless of the presence of open lesions;
      6) emptying urine drainage bags, suction catheters, colostomy and ileostomy pouches, handling of blood and urine specimens;
      7) providing mouth care; and
      8) assisting with minor surgeries, sanitizing, disinfecting and sterilizing instruments 9) other (at discretion of student and/or instructor).
   b. The use of masks, goggles or glasses and/or gowns/aprons when there is a possibility of fluids splashing onto the face or body and clothing.

Provision of Patient Care

Assignments are made in the clinical setting to enhance and/or reinforce student learning. It is the expectation that students will provide care for patients to whom they are assigned.

MEDICAL INSURANCE

Students are strongly encouraged to carry their own medical insurance. Any medical expenses incurred due to an accident or injuries during the time you are carrying out the duties of a student nurse are the responsibility of the student. Southeastern Community College does not provide any medical insurance coverage for students. Proof of medical insurance may be required to participate in clinical experiences as is required by certain facilities.
QUALITY ASSURANCE/SAFETY GUIDELINES

Quality Assurance is monitored to help insure patient safety and reduce liability by providing an accurate system for reporting and analyzing all occurrences.

An occurrence or variance or incident is defined as any unusual event or circumstance that is not consistent with the normal routine operation of the clinical facility and its staff. It may be an error or omission or any occurrence that is out of the ordinary, or an accident which could have or has resulted in a patient injury. Examples are listed below:

1. Medication and intravenous errors (incorrect medication, solution, time, dosage, route or patient)
2. Falls
3. Visitor accidents
4. Student needle sticks/accidents

The following procedure must be followed by students when an occurrence is identified:

1. Provide for patient’s safety.
2. Report occurrence to instructor immediately.
3. Complete facility's forms and documents.
4. Instructor will co-sign Occurrence Report and if needed communicate with the facilities safety officer.
5. A copy will be provided to the coordinator of the nursing program and placed in the student’s file.
6. Complete the college’s Incident Report form.

LIABILITY INSURANCE

The college's Liability Insurance covers students in the nursing program while the students are in a supervised clinical assignment or experience. The cost of the Liability Insurance is covered by the general fund.

Students involved in health careers working independently outside the curriculum offerings of the college should be aware that the policy purchased by the college offers no protection in this type of activity or employment.

The Nursing Program Coordinator/Director will provide the Incident Report form.

BASIC LIFE SUPPORT CERTIFICATION

All students are required to complete a Basic Life Support Course (BLS) for Health Care Providers program prior to enrollment and are to maintain certification or recertification throughout enrollment in the program.

BLS instruction is available through the Continuing Education Department.

A certificate will be awarded upon completion of this course. Certification is awarded for a 2-year period. Students must provide a copy of their certificate to the Nursing Program Coordinator/Director.

DEPENDENT ADULT/CHILD ABUSE MANDATORY REPORTING

All students are required to complete the Child and Dependent Adult Abuse Mandatory Reporting course prior to enrollment. This instruction is available through the SCC Continuing Education Department.

A certificate will be awarded upon completion of this course. Renewal must occur every five years.

Students must provide a copy of their certificate to the Nursing Program Coordinator/Director.
BACKGROUND CHECK POLICY

The education of health career students at Southeastern Community College requires collaboration between the college and clinical affiliates. The education of health career students cannot be complete without a quality clinical education component. The college shares an obligation with the clinical affiliates to protect the affiliate’s patients to the extent reasonably possible.

In establishing clinical affiliation agreements, healthcare educational programs are contractually obligated to comply with the requirements set forth by the clinical affiliates. Students enrolled in health care educational programs must conform to the rules, policies and procedures of the clinical affiliate in order to participate in clinical learning experiences. Therefore, all students enrolled in a Southeastern Community College Health Career Program will be required to complete a criminal background check. An independent third party vendor will be used to complete all Southeastern Community College background checks. The cost of these background checks has been added to your student fees when you enrolled in the program.

Students will be notified of the requirement for the background check prior to admission and upon admission to a health career program. The background check may include, but is not limited to searches, histories, and verification as listed below:

- Positive Identification
- Maiden/AKA Name Search
- Social Security Number Trace which is verification that the number provided by the individual was issued by the Social Security Administration and is not listed in the files of the deceased. The SNN trace is also used to locate additional names and addresses.
- Residency History
- National Criminal Database Searches which includes a compilation of historical data, collected from multiple sources in multiple states by background check companies.
- Child and Dependent Adult Abuse/Registries
- Office of Inspector General (OIG) search

Background checks which would render a student ineligible to obtain clinical learning experiences include, but are not limited to, certain convictions or criminal charges which could jeopardize the health and safety of patients and sanctions or debarment. Felony or repeated misdemeanor activity within the past seven (7) years and Office of the Inspector General violations will normally prohibit the obtainment of clinical learning experiences with clinical affiliate(s). Positive findings on background checks can have licensure implications upon graduation from a health program. Criminal offenses which occur during the nursing program shall consider due process which provides that an individual is innocent until proven guilty up until which time he/she pled or is found guilty and is then subject to review by regulating authorities.

Documentation of criminal background checks is maintained in secured files and destroyed upon graduation of the health occupations program.

The background information of any student with a discrepancy will be reviewed by the Director of Nursing and the student and submitted to the Department of Inspections and Appeals (DIA) for review. A representative from the assigned clinical experience or field internship site may also be consulted to ascertain the appropriateness of allowing the student to participate in clinical or field experience.

Students who are unable to resolve a positive background check will be dismissed from the health care program. A grade of "F" will be recorded for the course if the student does not officially withdraw. The student will be advised as to their eligibility for program re-entry and the mechanisms for reapplication to the program.

One background check is required during continuous enrollment in a program. In the event a student leaves the program, a new background check will be required prior to re-entry.
Background Check and Release Form

I have received and carefully read the Background Check and Release policy and fully understand its contents. I understand that the healthcare program to which I am admitted requires a background check to comply with clinical affiliate contracts. By signing this document, I am indicating that I have read and understand Southeastern Community College’s policy and procedure for background checks. I voluntarily and freely agree to the requirement to submit to a Background Check and to provide a negative Background Check prior to participation in clinical learning experiences. I further understand that my continued participation in the health care program is conditioned upon satisfaction of the requirement of the Background Check with the vendor designated by the College.

A copy of this signed and dated document will constitute my consent for release of the original results of my Background Check to the College. I direct that the vendor hereby release the results to the College. A copy of this signed and dated document will constitute my consent for the College to release the results of my background check to the clinical affiliate(s).

Printed Student Name

Student Signature

Date
DRUG TESTING POLICY

Drug testing/screening is required for all students who are required to complete clinical or field internships as part of a Southeastern Community College Health Career Program. The test shall consist of a urine specimen test and be completed at the assigned agency. The cost of this test is included in student fees charged by Southeastern Community College. The Program Coordinator/Director will provide more information as to testing times and location.

The drug test information of any student receiving a positive result will be reviewed by the Dean of Career, Technical, and Health Education, the Nursing Program’s Coordinator/Director and the student. A representative from the assigned clinical experience or field internship site may also be contacted to ascertain the appropriateness of allowing the student to participate in clinical or field experiences.

One drug screening is required during a continuous enrollment in a program. SCC reserves the right to conduct random drug screening. In the event a student leaves the program, a new test will be required prior to re-entry.

Documentation of drug test information is maintained in secured files.

TOBACCO FREE GUIDELINE

Administrative Guideline 840

ADMINISTRATIVE GUIDELINE TYPE: Physical Facility Functions
ADMINISTRATIVE GUIDELINE TITLE: Tobacco Free Guideline

PURPOSE:

Southeastern Community College is committed to providing its students, employees, partners and visitors safe and healthy environments. Tobacco products are a proven health and safety hazard, both to the tobacco user and non-smokers who are exposed to secondhand smoke. In addition to causing direct health hazards, smoking and other tobacco use contributes to institutional costs in other ways, including fire damage, cleaning and maintenance costs, and costs associated with employee absenteeism, health care, and medical insurance.

POLICY:

In compliance with the state of Iowa’s Smoke Free Air Act and Board of Trustees directive, as of July 1, 2008, the use of tobacco products, which includes smokeless and smoking tobacco, is prohibited:

- In all areas within Southeastern Community College buildings.
- On all property owned or jointly owned, leased, or operated by Southeastern Community College.
- In all vehicles owned, leased, or rented by the school.
- In all private automobiles parked on college property.

This policy applies to all employees, students, partners and visitors.

All persons in non-compliance of the Smoke Free Air Act and SCC’s policy will be considered in violation and subject to disciplinary action.

PROCEDURE:

1. No tobacco products shall be sold or distributed on Southeastern Community College property.
2. Campus organizations are prohibited from accepting money or gifts from tobacco companies that promote use of their products.
3. Tobacco advertisements are prohibited in college publications and at any athletic or other campus events.
4. Signs stating that the entire campus is tobacco free will be prominently posted at all campus and building entrances and other conspicuous places. All ash receptacles will be removed from the school grounds.
5. People who wish to consider employment at Southeastern Community College will be notified of its tobacco-free environment through information provided on the school’s website and job applications.
6. Employees will be advised of the provisions of this policy during new hire orientation. Supervisors will be responsible for notifying their employees of the provisions of this policy and assisting with enforcement.

7. This policy will be communicated to the public through signs, announcements, newsletters, media events, advertisements, the school website, and job applications.

8. Employees may attend tobacco cessation counseling. The state and national tobacco quit lines will be promoted as well.

9. Employees or students smoking or using tobacco products on Southeastern Community College property are in violation of the stated policy and subject to disciplinary action as outlined in the employee handbook or student handbook as applicable.

10. Employees and students will be educated on the tobacco policy and opportunities for cessation counseling throughout the disciplinary action process.

11. All Southeastern Community College employees are authorized and encouraged to communicate and reinforce this policy with courtesy and diplomacy to any person whom they see violating the policy. Individuals who refuse to comply with the policy should then be reported to your immediate supervisor, Human Resources, or Student Services as appropriate for immediate follow-up action.

12. Students, partners and visitors will be notified of this policy prior to arrival whenever possible.

---

Section V Nursing Program Completion

EXIT ASSESSMENT

The Southeastern Community College Nursing Program utilizes exit testing as a component of the curriculum. Standardized assessment enables the faculty and student to assess individual strengths and areas for improvement in order to verify students are progressing toward program competency attainment. During the exit testing students are expected to bring forward material learned throughout the program and apply this information while answering questions.

HESI Assessment and Guidelines for Success and Remediation Policy

The HESI (Health Education Systems, Inc.) assessment is a standardized test that is utilized at the end of the Practical Nursing and Associate Degree Nursing programs. The results enable the faculty and student to assess individual strengths and areas for improvement. The HESI test is an essential component of a student’s instruction in the program. The faculty of Southeastern Community College Nursing Program recognizes the value of the student ownership and empowering students to identify unique strengths and opportunities for improvement in preparation for the NCLEX license examination and for a successful career. Further, research shows that standardized testing in combination with reflective learning strategies lead to higher NCLEX pass rates (Homard, C. (2013). Impact of Standardized Testing Packages on Exit Examination Scores and NCLEX-RN Outcomes. Journal of Nursing Education. 52 (3), p.175).

The following guidelines have been established for testing and remediation:

1. The HESI tests administered in the nursing program are;
   - PN Exit Exam (E1)
   - ADN Exit Exam (E1)

   The HESI score to achieve is 850 or greater. This is the established benchmark for predictive NCLEX success and used at most participating schools (Langford R. & Young A. (2013). Predicting NCLEX-RN Success with the HESI Exit Exam: Eighth Validity Study. Journal of Professional Nursing. 29 No. 2S, p. S8).

2. If the benchmark score of 850 is not achieved remediation is required with the following guidelines:

   - 5 hours for scores 800-849
   - 10 hours for scores 750-799
   - 15 hours for score of 700-749
   - 20 hours for scores below 700

Remediation is a process for remediating or correcting areas of knowledge deficiency.
Remediation content is provided to support and develop a student’s weak areas in understanding important content at the concept level. Applying conceptual understanding is a component of critical thinking, critical to success on licensure exams (Elsevier, 2016).

Remediation is guided by the student. Each student has the ability to individualize their study materials for remediation. The remediation process can also be used to study for the comprehensive nursing final.

Half of the remediation time shall be completed prior to the final exam. Total remediation is required by the date of the student’s final program Summary Evaluation. The student is responsible for tracking hours. Faculty will verify hours at a determined date and time.

Upon course completion in preparation for NCLEX examination success all PN/ADN students are recommended to:
1. Remediate and study
2. Attend a scheduled NCLEX-PN or RN review session (on-line/in-person)
3. Take NCLEX-PN or NCLEX-RN within 3 months of graduation

SUMMARY EVALUATION POLICY

The Summary Evaluation will be completed on every nursing student that completes the Practical Nurse (PN) level and the Associate Degree Nurse (ADN) level of the nursing program. All nursing faculty members who evaluate students during the curriculum level will participate in preparing the summary evaluation of students.

The completed Summary Evaluation will be discussed with the student and signed by the student and faculty member conducting the evaluation conference. The evaluation should be dated at the end of the evaluation conference.

The signed Summary Evaluation tool will be placed in the student's program/graduate file. The student will receive a signed copy of the Summary Evaluation tool.

NURSING PROGRAM PINS

Each graduate of the nursing program is entitled to wear a distinctive SCC pin. In addition to identifying your alma mater, it is a symbol to others that you have completed a specific course of study in nursing.

GRADUATE RECORDS POLICY

The file of each graduate of the nursing program will contain summative evaluations, academic achievement documentation and summary evaluations. Documentation of disciplinary action will be forwarded to the Vice President of Student Services office upon graduation from the nursing program. All graduate files will be maintained for 3 years following completion of the program and then will be destroyed.

STUDENT/GRADUATE REFERENCES FROM NURSING FACULTY

The following guidelines must be followed as a student or nursing program graduate whenever requesting a letter of reference from a nursing faculty:

1. The student/graduate must provide the faculty member with written permission to provide reference information.
2. Provide name, title and address of the individual to whom the reference is to be mailed.
3. Provide faculty member with purpose (scholarship, employment) of reference and information to be included/areas to be addressed.
4. Provide graduation date and your name at the time of graduation.

Please be aware that no verbal references will be provided.
RELEASE OF INFORMATION

Student/Graduate Name

Faculty Member

Purpose of Reference

Information to be released;

☐ Any information requested
☐ Do not release the following;
  - Attendance
  - Grades
  - Other

I give my permission to the faculty member listed above to provide the indicated reference information to the person listed below:

Name...................................................................................................................................................................
Title......................................................................................................................................................................
Facility..............................................................................................................................................................
Address...............................................................................................................................................................

☐ I give my permission to the faculty member/members listed above to provide the indicated reference information to the person/facility.

☐ I give my permission for any facility requesting a reference from the above instructors.

Signature ...........................................................................................................................................................

Date .................................................................................................................................................................
GRADUATE SURVEY

Southeastern Community College and The Institutional Research Office collects post graduate information for continued program development and data regarding employment placement and wages.

The Graduate Survey is administered annually to recent graduates in order to collect placement information and evaluations of your preparation at SCC related to your education and ability to enter the workforce.

The survey information is collected anonymously and inquires as to your employment status, continuing education status, earnings employed in jobs related to your SCC program, what business you were hired in, the location or region of your job, and your overall satisfaction of your SCC college experience.

A release form is completed prior to graduation authorizing SCC to send a survey to you.

Southeastern Community College Health Occupations

Permission to Release Information

I consent Southeastern Community College to request and receive information regarding my performance, skills, abilities, knowledge, character, qualifications as well as any compensation information. I release the SCC and the employing facility from all liability for acts performed in good faith and without malice in connection with the evaluation of my professional practice after my first year of employment. This information will be used as a tool to evaluate the effectiveness of the health occupation program.

NURSING LICENSURE

Entry into the practice of nursing in the United States is regulated by the licensing authority within each state. To ensure public protection, each state requires a candidate for licensure to pass an examination that measures competencies needed to perform safely and effectively as an entry-level nurse.

Graduates of the nursing program in good standing are eligible for the PN-NCLEX or RN-NCLEX licensure examination. The NCLEX examination is administered through the National Council of the State Board of Nursing.

PREVIOUS ARREST AND CONVICTIONS POLICY

When a graduate of the nursing program makes application for Iowa licensure to practice nursing, you will be required to complete a section of the application related to a prior arrest record. You will be requested to answer a question about whether you have been arrested for any offense other than a minor traffic violation.

If you answer yes, you will be required to provide the following information:

1. Date of arrest
2. State and county
3. Country outside the U.S.
4. Charges
5. Disposition

You will be required to have arrest and court records of final adjudication for each offense sent to the State Board of Nursing. Your application will not be considered complete until these records are received. If the records are no longer available, you will be responsible for having certification of their unavailability sent directly from the arresting jurisdiction.

Students need to consider the above stated licensure requirements before planning for enrollment in the nursing program. However, the Iowa Board of Nursing office will not accept calls from pre-nursing students with arrest records to determine if you are eligible for licensure. This determination can only be made after graduation, when your application and all supporting documentation is received, reviewed by the Board staff and then presented to the Iowa Board of Nursing.

NURSING ARTICULATION FOR CONTINUED EDUCATION

Articulation is a process in which nursing education programs cooperate to meet student learning needs and career goals. Baccalaureate and higher degree nursing programs support the community college practical nursing and associate degree programs and recognizes their role within the healthcare system (Iowa Board of Nursing).

The SCC Nursing program is fully accredited by the Iowa Board of Nursing, The Iowa Department of Education and the Higher Learning Commission. The Associate of Applied Science Degree in Nursing will articulate for placement in nursing programs at baccalaureate degree granting institutions. SCC supports baccalaureate and higher degree nursing education.
