9:15 & 10:15 BREAKOUT SESSION 1 & 2

BUILDING AN ELECTRICAL SAFETY CULTURE

David Rector, Southeastern Community College

The session will center on the basic elements of electrical safety and how to incorporate cultural values into electrical maintenance and construction.

WORKING TOGETHER SO ALL CAN WORK: A LOOK AT DISABILITY ETIQUETTE AND ADA GUIDELINES

Cynthia Whalen, Vocational Rehabilitation

Michelle Kreft, Vocational Rehabilitation

Lanae Greene, Disability Employment Initiative

Rosemary Thierer, Iowa Department on Aging

This session will discuss disability etiquette in the workplace. We will look at ADA guidelines for employment and providing accommodations, in order to provide safe work spaces that would increase employment retention for persons with disabilities.

ALCOHOL AND OTHER DRUGS IN OUR COMMUNITY

Jim Towleron, Greater River Health Systems

An overview and description of alcohol and other drugs currently being used and abused in our community.

SAFETY CULTURES THAT LAST

Steve Yates, CHST, Optimum Safety Management

Organizational culture starts with leadership and organizational influences. It possesses power to shape behaviors and interactions, initiating a winning culture. Leaders must first understand how great safety cultures begin, to understand their role. Join us to learn principles of building safety culture and develop actionable steps to implement immediately.

ACTIVE KILLER TRAINING

Angie Vaughan, City of Burlington, Des Moines County

The Active Killer Training program is designed to give a person, or group of people, who may find themselves in a violent, life threatening situation, some mental and physical tools that could play a vital role in their survival. The program is designed so that anybody can employ the strategies. Young, old, male, female, strong or not, it does not matter. One does not have to be Police or Military trained in order to survive a violent encounter. They do need to have a frame of reference from which to draw, when making life saving decisions under extreme pressure, much like preparing for a fire or a tornado.

EMPLOYEE ERGONOMIC INJURY PREVENTION TRAINING

Chris Toyne

Injury prevention through the proper use of ergonomics is a powerful tool. By attending this session you'll be more informed and motivated to be responsible for taking care of employee's, aging bodies and for using their bodies appropriately at work and home. Musculoskeletal Disorders (MSD's) develop gradually over a period of time. Practicing safe work methods now can prevent an injury.

11:00 AM LUNCH / EXHIBITORS OPEN

12:15 & 1:15 BREAKOUT SESSION 3 & 4

BLOODBORNE PATHOGENS – WHAT YOU AND YOUR EMPLOYEES NEED TO KNOW

Mary Daniels, Two Rivers Insurance Services/Professional Safety Services

The session will answer many questions about the OSHA Bloodborne Pathogen Standard. What organizations must comply with the Standard? What the OSHA standard requires of employers? How to develop your exposure control plan. Are you required to have first aid responders? What do my employees need to know - training? What to do in the event of an exposure incident.

REFRIGERANT MANAGEMENT

Misty Sinclair, P.E., Trinity Consultants

The Refrigerant Management session will discuss the recent updates to the refrigerant management requirements within 40 CFR Part 82, Subpart F, including extension of the rules to non-ODS substitutes with phased in compliance dates of 1/1/2017, 1/1/2018, and 1/1/2019.

CONFINED SPACE RESCUE: LET'S MAKE A PLAN

Jerry Eslick, PRI Rescue

Rescue planning is critical; an unplanned rescue could be the attendants' last one if it is not thoroughly planned. Therefore it is required that an emergency response plan be prepared prior to anyone entering a confined space. A plan shall be written and established by the CSRT to address the response, to identify potential emergencies and to provide for timely evacuation, retrieval or rescue of entrants in a permit-required confined space. The plan must include: the known hazards identified; tools, lighting, communications and atmospheric monitoring and test equipment that will be used in hazardous or classified locations; limited room and access or configuration; PPE; ground fault circuit interrupters (GFCI); permits; and retrieval equipment.

OSHA UPDATES 2018

Alma Marquez, Iowa OSHA Consultation and Education

We will look at key updates in regulations/standards, reporting requirements, and look at trends of 2017 fatalities on the job for Iowa employees.

MENTAL HEALTH SAFETY IN A WORK ENVIRONMENT

Dena Prainito, LMSW, Community Health Centers Southeastern Iowa

This breakout will discuss mental health in the work force, ways to recognize and de-escalate issues concerning ones mental health. We will cover statistics if mental illness in work environment, referral resources, and needed support.

INTEGRATING WORKER HEALTH, SAFETY & WELL-BEING INTO ORGANIZATIONAL CULTURE

Jamie Dengler, Great River Health System

Companies can improve their employee and financial performance when health protection and health promotion efforts are aligned. The holistic approach allows organizational functions to effectively combine programs, policies and processes that increase their overall impact. It also maximizes employers ability to protect employees from occupational injury and illness, promote health, and support a sustained culture of health and safety.

2:00 PM KEYNOTE SPEAKER

KEYNOTE AND WRAP UP

Dr. Jim Withers

How safety professionals and other Leaders in an organization can be change agents for positive safety cultural change through purposeful and regular engagement with employees.

Keynote Speaker, Dr. Jim Withers

Dr. Withers has been an Industrial Hygienist & Safety Professional for over 28 years. His educational background includes a B.A. in Biology from Luther College and a M.S. in Preventive Medicine & Environmental Health (emphasis in Industrial Hygiene) from the University of Iowa. Dr. Withers also holds a Ph.D. in Industrial Technology from Iowa State University where his doctoral research focused on learning and retention differences between students taking chemical safety training on a computer versus in the classroom. Dr. Withers is both a Certified Industrial Hygienist (CIH) and a Certified Safety Professional (CSP) and has guest/adjunct faculty appointments at Iowa State University and Columbia Southern University. Professional passions include Industrial Hygiene, Maximizing Training Effectiveness, Human Behavior & Safety, Leadership in Safety and Organizational Safety Culture. Currently, Jim is the Corporate HSE Director for the American Packaging Corporation in Story City, Iowa. He and his wife, Jenifer, have 4 sons and live in Ames.

Presenters

Mary Daniels

Over 30 years of experience in industrial hygiene and insurance industry risk management. Work experience in all lines of insurance. Duties included risk management program development, industrial hygiene and safety. Risk management studies for municipal, educational institutions, trucking, manufacturing, mining, construction, health care, and other industries. Mary has worked with clients to identify and control hazards for casualty and property insurance accounts. Mary also provides primary staff consultative and field technical support on occupational health and safety issues. She has been an Adjunct at Eastern Iowa Community Colleges Occupational Health and Safety and Health Sciences departments for over 20 years.

Jamie Dengler

Jamie Dengler, BS, MBA, Great River Health System, is on a mission to build healthier companies in Southeast Iowa. She believes the value of health is reshaping corporate culture and is the strongest contingency for industry sustainability and profitability. Through Jamie's two decades of work in healthcare and with executives and corporate management, she continually seeks to identify best practices and emerging next practices for Health, Safety and Productivity Management.

Jerry Eslick

Jerry, owner/instructor of Professional Rescue Innovations, is currently the Deputy Chief of Training for the West Des Moines Fire Department. He's a thirty-two year veteran of the fire service, and a Field Staff Instructor for the Fire Service Training Bureau. Jerry began his career in the Air Force as an ARFF firefighter. He retired after twenty-one years of service with the Air National Guard in Des Moines, and in 2008, received the Iowa Society of Fire Service Instructor's "Instructor of the Year Award". For the last 20 years, through Professional Rescue Innovations, Jerry has been teaching fire and rescue related programs to fire departments throughout the Midwest as well as onsite hands-on safety programs focused on the needs of industry.

Alma Marquez

Alma Marquez is a graduate from Iowa State University with a background in engineering. She has been working in the safety field as an industrial hygienist for Iowa OSHA Consultation & Education for about two years.

Dena Prainito

Graduated from UNI Master's program in 2009, have been practicing since. Started at Community Health Center in January 2017 after moving back to Iowa from Los Angeles. Currently, working with Keokuk Clinic practicing mental health therapy.

David Rector

David worked in the electric generation, transmission and distribution field for nearly forty years as an Electrician, Technician, Construction Supervisor and Quality Management Supervisor. David has over 25 years in the Safety and Training field having been the Senior Training Supervisor for the Ameren Corporation based in St. Louis, Mo. Mr. Rector is an authorized OSHA instructor for both General Industry and Construction as well as a Certified Crane Operator Trainer. David currently teaches technical maintenance and safety programs as the Program Coordinator /Trainer for Southeastern Community College's Center for Business (CBIZ).

Misty Sinclair

Misty Sinclair, P.E., is a Senior Environmental Consultant at Trinity Consultants. She has worked with the Burlington, IA office for more than 5 years assisting a variety of industries such as; chemical production, cement manufacture, equipment manufacture, seed processing, steel foundry, and food manufacture. Her experience includes air compliance, storm water management, environmental reporting, and auditing.

Jim Towlerton

University of Iowa Alcoholism Unit 1966-1970, Principal Investigator for training program for Alcohol and Other Drug Counselors working in poverty programs Federal Regions V & VII 1970-1975, Alcohol

and Other Drug Counselor Great River Medical Center-Great River Health Systems 1975 to Present

Chris Toyne

Chris Toyne is a job site safety professional with a background in physical therapy and ergonomics. He has been providing job site safety with CIS Onsite for two years. His goal is to keep employees working and healthy with ergonomic education/recommendations, prevention techniques, and early intervention. He considers it his personal mission to help companies protect their most important asset it's "employees"

Angie Vaughan

Angela Vaughan is the Safety Director for the City of Burlington, Des Moines County and several other government agencies in our area. She has been a Certified Active Killer Instructor for 4 years and works closely with local Law Enforcement agencies to help train and prepare people in our community for what options they have if and when faced with these types of critical incidents.

Workforce Panel

The Workforce Innovation and Opportunity Act partnership between the Department of Labor programs has allowed Vocational Rehabilitation, Iowa Department on Aging and the Disability Employment Initiative to come together to promote employment for persons with disabilities. It is through this partnership that we give insight on ways employers and job seekers with disabilities can work together to ensure employment success!

Steve Yates

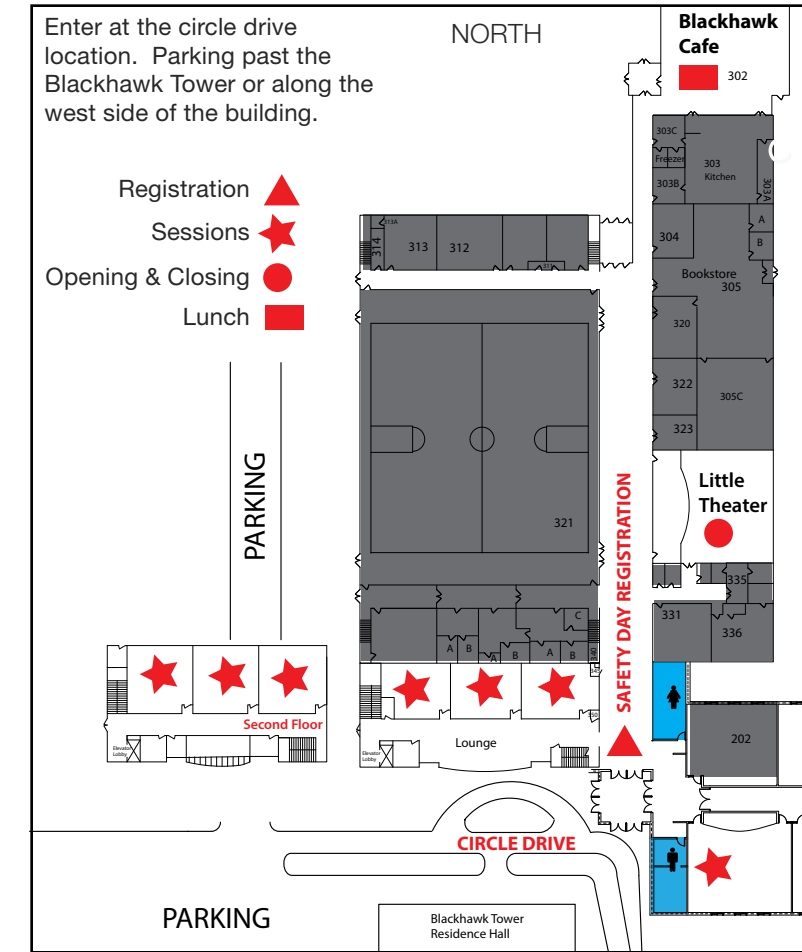

Steve is an experienced Safety Professional and Founder and CEO of Optimum Safety Management. He has a mechanical engineering background with vast experience in both manufacturing operations and construction technology. Authorized as an OSHA outreach trainer for Construction, Steve is also a certified Leadership Coach. His passion is to develop leaders within his clients' organizations who will value and empower others.
