BUSINESS MANAGEMENT

Smart Start
Do you have a business idea or looking to purchase a business? This workshop will guide you through what you need to know to launch your business and be successful. Hear from a local entrepreneur about how they started their business and lessons learned along the way. Learn how to create a business plan, conduct market research and estimate costs, prepare for a bank loan, legally organize the business and other license/permit requirements, record keeping and taxes, marketing ideas, and what financing options are available. Receive a business plan template, step-by-step guide to opening your business, and other resources available to help you succeed!

Class sponsored by America’s SBDC Iowa.

Quickbooks Online Software
We make it easy to get comfortable with QuickBooks. This course will address setting up your chart of accounts, customer and vendor files, recurring transactions, and products/services you sell. Learn how to manage money coming in including sales, invoicing and deposits and money going out by paying bills, booking credit card expenditures and tracking expenses. You’ll learn how to reconcile accounts, track loans and loan payments, book fixed assets and use reports to understand your business, track sales trends and profitability, and prepare for tax time.

Payroll Accounting
It’s a fact of business—if a company has employees, it has to account for payroll, fringe benefits, and payroll taxes. This comprehensive course will guide you through processing a new employee, calculating payroll and payroll taxes, payroll tax reporting, periodic and year end payroll reporting to the government.

Understanding Business Taxes
Income tax, sales tax, payroll tax, and the list goes on for taxes your business pays. Discussion will center on the various business taxes, forms and ways to file and pay the taxes, and things you can do in your record keeping system to better understand and lessen your tax burden. Participants will receive all materials and are encouraged to bring specific questions.

Business Bookkeeping CERTIFICATE PROGRAM
This Certificate is designed for those who want to become a bookkeeper or for small business owners who would like to understand bookkeeping better. Increase your skills in payroll, Quickbooks, and tax knowledge to enable you to perform bookkeeping accurately and efficiently.

Look for † to locate Business Bookkeeping Certificate classes in this catalog.

Tuition Assistance May Be Available

Classes begin February 19. Look for Fall certificate offering beginning late Sept. Certificate classes may be taken individually outside of the certificate.

Accounting Basic Concepts
Designed for the non-accountant bookkeeper, office manager or owner of a business. Learn basic accounting terms including revenues, expenses, assets, and liabilities. Learn to build and read the income statement, balance sheet, and statement of cash flows. Become familiar with accounting debits and credits as you learn how to record transactions in this hands-on course.

CUSTOMER SERVICE

Managing Customer Service
Learn how to correctly anticipate and meet your customers’ needs. This course will help you discover some effective methods to bring out your best and do the same for the other people you work with as you serve as an ambassador for your company.

LEADERSHIP

Supervision Survival Skills
This training program is designed for new managers and non-managers interested in or identified for promotion. Knowledge gained in this program will enable you to avoid some of the hard lessons that come from on-the-job learning. Applicable in manufacturing, service, and retail organizations, this seminar presents the fundamental leadership and communication skills and techniques required to manage employees effectively. Content of this training covers the first two modules of the Supervision Certificate.

Supervision Certificate
Leader, manager, supervisor, team leader – no matter what your official title, you’re expected to get the job done through others. This course provides new and experienced supervisors with the tools and skills for building personal confidence in their leadership role. You will see the relevance of the training, rapidly acquire the skills, and quickly put them to use on the job. Attend all twelve modules and earn a certificate in Supervision. Our program is designed for anyone who manages people in manufacturing, retail, or service industries.

Tuition Assistance May Be Available
Leading Change in the Workplace
When faced with change, you have one of three choices. Lead, follow or get out of the way. Choose to lead! This course will help managers deal with change in the workplace - both personally and as a leader of their team. Topics include understanding both positive and negative effects of change, learning personal response to change, helping to lead employees through change, seeing change as an opportunity, and communication during change.

**Effective Management CERTIFICATE PROGRAM**
This certificate is the next step in professional development after the Supervision Certificate and is built especially for those who have been promoted from supervisory to managerial responsibilities. Certificate candidates must successfully complete all 15 courses within a two-year period from the start of their first class. Classes may be taken in any order.

Effective Performance Appraisals
Learn to measure performance and evaluate nontangible skills. Learn to evaluate employees' current performance and write performance objectives they can follow. This course covers when employees do not meet expectations and disciplinary action that must be taken; as well as progressive discipline including written performance plans.

Delegating for Leaders
The strongest leaders are those that empower others to be involved with the work of their organization. Too many leaders believe they have to shoulder the weight of the priorities alone. This is not so. A key skill to develop is that of being able to delegate all kinds of work tasks, priorities and projects to team members at every developmental level. In this session, participants will learn the importance of delegation, the proper way to delegate to people at each development level, novice to expert, and how to build bench strength as a result of proper empowerment and delegation.

HR Legal Issues for Managers & Supervisors
Learn about the human resource function and legal issues that impact a manager's role. Get an overview of the major employment laws and work with case studies to apply the principals learned.

Emotional Intelligence
Your emotions play a vital role in our work and personal lives. Channeling your emotions, either positively or negatively, can make or break your professional relationships. We will gain insight into how to use our emotions to create positive workplace results. Through discussion, we will uncover techniques that will allow you to set aside emotions that sabotage your own effectiveness.

Approved course for ★ Effective Mgmt. Certificate

TAURA PROSEK
Taura Prosek is an executive coach and career strategist with Stewart Leadership, and has a background in finance, sales, and human resources in industries ranging from banking to manufacturing to higher academia. She's coached thousands of professionals and is the author of a career development resource called, Lead Your Career: A Step-by-Step Guide to Achieving Professional Fulfillment. She is a Gallup-certified CliftonStrengths Coach and is a Professional Certified Coach (PCC) with the International Coaching Federation. She has an MBA from Kellogg-Northwestern and a BBA from UW-Madison.

Elevating Executive Presence
Leaders at all levels are often asked to strengthen their executive presence yet don’t always understand how executive presence translates into everyday behaviors. This workshop will focus on a 4-part executive presence framework including: 1) how you show up; 2) how you deliver; 3) how you manage emotions; and 4) how you inspire. Leadership strategies will be shared, that when put into action, elevate executive presence, strengthen confidence, and accelerate impact.

CLASS FORMATS: Face-to-Face (classroom) Live Online (videoconference) Hybrid (classroom & online) Online (self-paced)

3
Employment Law Basics and Discipline & Parting Ways

**EMPLOYMENT LAW BASICS**
A general overview of basic employment law and compliance issues that provide the foundational framework for a supervisor. A grasp of employment law will help avoid legal pitfalls while helping create and sustain a welcoming and equitable environment. Topics include: Equal Employment Opportunity (EEO), Americans with Disabilities Act (ADA), Health Insurance Portability and Accountability Act (HIPAA), Family Medical Leave Act (FMLA), and Fair Labor Standards Act (FLSA)

**DISCIPLINE & PARTING WAYS**
While no one looks forward to disciplining or firing employees, it is a reality that these situations will occur from time to time. Disciplinary issues and termination of employment affects recruiting, retention, employee relations, morale, productivity and more. Numerous legal risks may arise as well when an employer fires an employee. This highly interactive session will provide the tools and processes necessary to help you address discipline and termination issues in an equitable, respectful, and legally defendable manner.

Optimizing Your Microsoft Outlook
Get more from all five of the key Outlook functions for greater productivity. In this popular program review the most common areas of productivity loss (and possible gain!) afflicting many busy professionals today: managing multiple projects, maintaining “taction” when dealing with tasks and interruptions, getting more from time spent in meetings, clearing the clutter in your mind for better focus, keeping staff on task, tracking “who owes you what” and getting that information on time, and better managing your calendar and contacts for better time and relationship management.

Google Keep, Google Drive, and Shortcuts
In this program discuss three very powerful tools readily available to Google users - Keep, Drive, and a Chrome Browser add-on - Google Shortcuts. These tools are a wonderful supplement to those using the Google Suite for productivity, and enhance the human experience and capabilities beyond Gmail and Google Calendar. You will learn how to use Google Keep to create and share notes, checklists, and more; how Drive can be your primary cloud drive for your documents and files, how to share items and documents with Drive, and how to use the Drive app on your phone as a scanning/PDF creation device. You will also learn about Google Shortcuts - a very powerful tool for your Chrome browser that allows you to put your most-used Google apps and tools at your fingertips for quick and easy access. Take your Google usage to a new level with this program!

### EDUCATION

**Early Childhood Certificate Level I**
This certificate equips individuals with an operational understanding of both historical and modern approaches to early childhood programs, covering the qualities and skills necessary for working with young children. Health, safety, and nutrition are also discussed as factors which impact growth and development of children from birth to age eight.

Look for ★ to locate Early Childhood L1 classes.

**Fall Certificate offerings starting in Mid-Sept.**

**TUITION ASSISTANCE MAY BE AVAILABLE**

**Credit Option. Call 319-208-5155**

**Early Childhood Certificate Level II**
In this certificate students learn to develop curricula to support the development of each child, implementing evidence-based practices while being mindful of the impact of each child’s family life, culture, language, and abilities. Students also learn to create appropriate learning opportunities, interactions, and environments for children to experience dramatic play, art, music, and fine and gross motor play; ultimately, students will be able to use assessment to analyze and guide children’s behaviors.

Look for ★ to locate Early Childhood L2 classes.

Classes start January 30, 2024

**Fall Certificate offering starting in October.**

**TUITION ASSISTANCE MAY BE AVAILABLE**

**Credit Option. Call 319-208-5155**
Early Childhood Guidance
This course focuses on developmentally appropriate, evidence-based approaches and positive guidance strategies for supporting the development of each child. The course emphasizes supportive interactions and developmentally appropriate environments while using assessment to analyze and guide behaviors. Students will learn the impact of family and each child’s culture, language, and ability on child guidance.

Approved course for Early Childhood L2 Certificate

SHRM Essentials of HR
Sharpen Your HR Skills to Face Today’s HR Issues. SHRM, the leading global HR professional organization, has developed the SHRM Essentials of Human Resources course, which teaches the HR knowledge, skills and competencies required for overall business success. Whether you are new to HR, or it’s one of the many roles you fulfill at your company. In less than 20 hours of training time, you can cover the issues you need to reduce potentially costly lawsuits. The straightforward format ensures that HR concepts can be mastered and applied to real-life situations.

This course is in partnership with North Iowa Area Community College (NIACC). Registration Deadline is 1/2/24
92078 $699
Th, Jan 11 - Feb 8 6 - 9 PM  SCC VIR

SHRM Certification Prep
Commit to Your Career. HR professionals like you are facing new and larger challenges each day due in part to a changing workforce, shifting legislation and regulations and so much more. Ensure you’re prepared for these changes and anything else thrown your way with SHRM’s global HR credentials, SHRM-CP and SHRM-SCP. Unlike memorization-based certification credentials, SHRM certification measures an HR professional’s most critical skill: the ability to apply HR principles to real-life situations. No other exam compares. By becoming SHRM certified, you prove your knowledge, competency and value to colleagues and to employers looking for a competitive edge in today’s global economy. Wherever your career takes you, your SHRM certification will define you as an HR expert and leader. Network and collaborate with peers to share real-life examples and bring HR knowledge and competencies to life. The tuition includes the cost of instruction and the SHRM learning system (online and printed material).

This course is provided through a partnership with North Iowa Area Community College (NIACC).
92022 $1345
Th, Feb 15 - May 16 6:30 - 9 PM  SCC VIR
**Daniel Carper**

Brian Carper was a Burlington Police Officer from 1995-2023 when he retired. During his tenure as an officer he became an instructor in Crisis Intervention for officers. He is also an instructor in Mental Health First Aid. Brian was a hostage negotiator, gang investigator, field training officer and was a member of the Problem Oriented Policing Unit during his tenor at the Burlington Police Department. Brian is also the founder of Quarantine Kitchen which is a cooking site on Facebook that is in 99 counties and has 24,000 members. He currently instructs Public Safety at Burlington Community High School.

---

**MARKETING & SALES**

**Sales Training Suite**

Learn the skills you need to obtain a lucrative career in sales. This group of online sales classes will teach you everything from cold calling to closing the deal.

**Introduction to InDesign CC**

Learn how to use Adobe InDesign CC software to create professional quality letterhead, brochures, forms, eBooks, business materials and more. This course uses hands-on exercises and expert instruction to help you discover how the program features relate to producing actual usable documents.

**Using Social Media in Business**

Learn how to use the five most popular social media platforms – Facebook, Twitter, LinkedIn, Pinterest and Instagram – to grow and promote your business.

**Marketing Your Business on the Internet**

In this hands-on course, you’ll discover proven methods for establishing an Internet presence and building a brand identity. You’ll learn to incorporate SEO, advertising, email, social media, and more to develop an effective interest marketing plan for your business even with little money to spend.

---

**SOCIAL MEDIA**

**Creating WordPress Websites**

Learn how to create attractive, sophisticated blogs and websites—without any coding! WordPress is the world’s most popular content management system, powering more than 40 percent of all sites on the Internet. WordPress is an easy-to-use solution that will help you put your site on the web in far less time than by coding, and at a much lower cost than hiring a professional.

**Spanish for Manufacturing Series**

Russ Curry and his team of subject matter experts bring an extra level of industry expertise, including in manufacturing and ag, to more effectively meet your bi-lingual workforce presentation and translation services.

Services Include:
- All our presentations, training and consultation can be presented in Spanish and hybrid English/Spanish formats.
- Onsite and virtual workforce focused Spanish language training
- Onsite and virtual workforce focused English language training
- Translation services for employee handbooks, work documents, safety documents, recruiting and hiring documentation and more
- Partnering with applicant screening and onboarding in Spanish

Contact Beth at 319-208-5388 or bnickel@scciowa.edu to learn more.

---

**COMMUNITY HEALTH WORKER**

The Community Health Worker (CHW) course prepares the student to understand the emerging role of the CHW and equips participants with tools and resources to help navigate health access leading the community to better outcomes. Community Health Workers use their lived and learned experience to service diverse populations in a variety of settings. Participants will learn how to bridge the gap between client needs and local resources. This 80-hour course provides 64 hours of lecture time and 16 hours of clinical time.

This course is free of charge and funded by the Lee County Health Department through grant number 22-117 with Health Resources and Service Administration (HRSA) of the U.S. Department of Health and Human Services (HHS). The textbook is provided. Mileage reimbursement to clinical sites provided.

**INTERESTED IN LEARNING ABOUT MORE HR CLASSES? CALL 319-208-5375**

---

**Mental Health**

This is a class that will study the signs and symptoms of mental health. It will also discuss how to guide assistance to someone with a mental health crisis and discuss de-escalation techniques to assist with a mental health crisis or every day situations.

**New Customer Service Representative (CSR) Exam Prep**

In this course, you will learn about the various duties and responsibilities of the customer service provider, and you will practice these using a variety of exercises, hypothetical interactions, and assignments. The goal of this course is to prepare you to be an outstanding, reliable, and successful customer service representative and will also prepare students to take nationally recognized customer service certification exams, including, but not limited to, the HDI Customer Service Representative Certification Exam.

**New Mental Health**

This is a class that will study the signs and symptoms of mental health. It will also discuss how to guide assistance to someone with a mental health crisis and discuss de-escalation techniques to assist with a mental health crisis or every day situations.

COMPUTER TECHNOLOGY

OFFICE PRODUCTIVITY

Basic Computer Essentials
Feel like you need to know more about computers? This course is the starting point and is targeted to individuals who do not have any background, knowledge, or experience in computers and who need to use personal computers at home or the office. Learn how to use a computer in a fun and relaxed environment. A step-by-step approach will be utilized to cover the Windows operating system, word processing, working with files, Internet and email. This course will provide fundamental computer competencies to survive and prosper in today’s fast-changing world. No computer experience necessary.

Excel Basics
Work with numbers? Then you need to learn Excel. In this class, you will use Excel and discover dozens of shortcuts and tricks for setting up fully formatted worksheets quickly and efficiently. You’ll benefit from hands-on activities covering creating and editing workbooks, modifying worksheets, using calculations, formatting worksheets, and managing large workbooks. Experience with Windows is recommended.

Word Basics
In this course you will gain basic proficiency with Microsoft Word. Discover the best and fastest ways to perform everyday tasks. Learn how to create and edit documents, format characters and paragraphs, create and manage tables, control page layout, work with web features and instant messaging, and much more. You’ll be able to practice what you learn in this hands-on course.

Excel Intermediate
Continue with your Excel proficiencies by learning the benefits of the more advanced features of Excel. Topics covered include using multiple worksheets and workbooks, customizing Excel, working with functions, list and data analyzing, and management. You will also be working on visualizing data with charts and using PivotTables and PivotCharts. Pre-requisite: Excel Basics or equivalent knowledge.

Word Intermediate
Topics covered include working with sections and columns, formatting tables, working with Excel data, working with styles, headers and footers, printing labels and envelopes, working with graphics and objects, document templates, and managing document revisions. Pre-requisite: Word Basics or equivalent knowledge.

Excel Advanced
In Excel Advanced, students will discover how to forecast data. Learn the advantages of working with multiple worksheets and workbooks in consolidating data and using lookup functions and formula auditing. This class will not only go through the automating workbook functionality but also give you the know how to share and protect workbooks and create Sparkline and mapping data. Pre-requisite: Excel Intermediate or equivalent knowledge.

Word Advanced
Topics covered in this class include working with forms, working with large documents, creating macros, customizing menus and toolbars, using XML features, and sharing Word documents. Pre-requisite: Word Intermediate or equivalent knowledge.

Access Basics
This course will take you from knowing little or nothing about databases and Access to a basic level of understanding. Topics include database concepts, databases and tables, fields and records, data entry rules, simple queries, using forms, creating and modifying reports, and much more. You’ll practice what you learn in this hands-on course.

Computer Skills in the Workplace Level I & II CERTIFICATE PROGRAM

These hands-on certificate programs are for those who need or want to learn more about the world of computers using Microsoft programs. In Level I, students will learn the essentials of computing for today’s technological workplace learning fundamental concepts and functions of a wide variety of computer software applications. Level II will take the skills learned in Level I to the next level gaining a deeper working knowledge of the computer software applications. These certificates will help a student in a cross section of occupations. A final project will be due at each Level that will assess and review the concepts covered in the program. Level I is recommended prior to Level II, but not required.

Look for ★ to locate Computer Skills in the Workplace Level I and Level II certificate classes.
Certificate classes may be taken individually outside of the certificate.

TUITION ASSISTANCE MAY BE AVAILABLE
*Level I classes start March 19
*Level II classes start January 16 & April 30
Look for Fall Certificate offerings. Level I starting August and Level II starting in October.
Access Intermediate
Topics covered include relational databases, working with related tables, complex queries, advanced form design, advanced reports, charts in forms and reports, pivot tables and pivot charts, and internet integrations. You’ll practice what you learn in this hands-on course. Prior knowledge of Access required.

Approved course for ★ Computer Skills L2 Certificate

LEAN

Lean Practitioner CERTIFICATE PROGRAM

REDESIGNED! You might be closer than you think!

Become a Certified Lean Practitioner and flex your continuous improvement muscle!

CBIZ’s extensive coursework gives you the skills and confidence to ask questions, spot problems, and take ownership in the transformation process.

Our three-tiered certification provides professional development for people in all levels of an organization:

1. Lean Practitioner Level 1
2. Lean Practitioner Level 2
3. Lean Practitioner Level 3

The certification program is hands-on and application-based, which allows participants to better absorb what they learn in the coursework. Implementation activities will be required at the completion of Level 2 and Level 3 coursework.

Look for ★ to locate the Lean Practitioner L1 Certificate classes in this catalog.

Introduction to Lean

This is a hands on, fast moving introduction to Lean Manufacturing that introduces both principles and tools.

Approved course for ★ Lean Practitioner L1 Certificate
1. 91968  $459  V Baum, A Clausen
   W, Mar 27  8 AM - 5 PM  SCC CBIZ 111

Standardized Work

In this four hour class you will explore standard work as an element of continuous improvement, identify the steps in creating and maintaining standards, examine the key formulas, tables and worksheets to create standard work and determine the applications of standard work for training, improvements, and decision making.

Approved course for ★ Lean Practitioner L1 Certificate
1. 91966  $295  P Totor
   W, Mar 6  8 AM - Noon  SCC CBIZ 112

Lean 101

Combined classroom and hands-on simulation of an operating factory in a 1-day, 8-hour course. This is the first step in learning the principles of Lean manufacturing. No previous experience is required. The course is a mix of classroom and live simulation. You begin by manufacturing simulated circuit boards in a traditional forecasted manufacturing setting. The results of the simulation provide the basis for continuous improvement by applying Lean manufacturing principles. Performance improvements are measured and compared for improved results.

Approved course for ★ Lean Practitioner L1 Certificate
1. 91968  $459  V Baum, A Clausen
   W, Mar 27  8 AM - 5 PM  SCC CBIZ 111

5S Workspace Organization

5S is one of many important tools used within the Lean method to help create and maintain order. You will learn how to assess an area and apply a systematic approach to create order and efficiency within a workspace. You will explore systems to help maintain improvements over the long term. These principles will be applied in an out-of-class, hands-on project.

Approved course for ★ Lean Practitioner L1 Certificate
1. 91969  $295  P Totor
   W, Apr 3 & 17  8 AM - Noon  SCC CBIZ 112

5S Workspace Organization

SPANISH VERSION

Approved course for ★ Lean Practitioner L1 Certificate
1. 93316  $295  P Gonzalez Rangel
   W, May 1 & 15  8 AM - Noon  SCC CBIZ 112

VICKI BAUM

Vicki brings over 35 years of manufacturing experience to her current role with B Better Training and Consulting – a Lean consulting firm challenging clients to be better every day. With over 30 years of leadership experience combined with formal Lean training and many years of continuous improvement experience, she is dedicated to helping her clients develop a culture of improvement that strengthens their competitive position each and every day. She has coached more than 350 Lean projects or events in manufacturing, healthcare and office environments with over 35 organizations and is a certified trainer or master trainer for a variety of Lean courses in each of those areas.

PLC Intermediate
This course is designed for maintenance personnel and electricians working in plants, facilities, or commercial buildings with basic PLC knowledge using the Compact Logix 5000 System. The topics covered in this course will include hardware components, establishing communication to the PLC, uploading, downloading, online, offline, run mode, remote mode, program mode, and basic PLC programming. Also covered is interpretation of ladder diagrams, search functions, addressing, program files, data files, troubleshooting, and working with the following instruction sets: XIO, XIC, OTE, OTL, OTU, TON, RTO, TOF, RES, CTU, and CTD.

PLC Advance Application Topics
PLC Advance Applications Topics explores debugging and problem solving of PLC programs and hardware. It is important that participants have a solid understanding of PLC programming and field hardware. Participants who have successfully completed PLC Basics and Intermediate will be ready to take their skills and knowledge to the next level.

(BIMT) Basic Industrial Maintenance
Redesigned to better meet the needs of local industry. This certificate consists of two tracks to give you the basics of operating, repairing, and troubleshooting industrial equipment. Classes meet every other week for three weeks. Become proficient in both electrical and mechanical maintenance by completing the full Basic Industrial Maintenance Certificate.

The Mechanical track will consist of 3 weeks (90 Hours) of training. Participants will learn shop math, how to read and interpret mechanical drawings, and how to make precision measurements. In addition, they will learn about power transmission systems such as belt, chain and gear drive. Along with that they will also learn and practice convention shaft alignment. Classroom instruction will include; hydraulic and pneumatic basics, lubrication, pumps and valves and control valve actuators.

The Electrical track will consist of 3 weeks (90 Hours) of training. The fundamentals of electricity including electron flow, magnetism, how to measure electrical values using a meter, Ohm’s, Kirchoff’s and Lenz’s Laws. In addition students will learn about electrical safety in an industrial environment, how to read and interpret wiring diagrams and schematic diagrams, basic control circuits, how a motor works and how to troubleshoot a circuit, electrical troubleshooting and the basics of Programmable Logic Controllers, and process control.

Electrical Fundamentals
This course introduces the student to basic electrical theory and troubleshooting. Topics include: circuit components, Ohm’s, Lenz’s and Kirchoff’s Laws and their use in circuit calculations. How to use an electric diagnostic meter, measure common electrical values; Ohms, Amps and Volts. How a generator works, Alternating Current basics including RL, RC and RLC circuits and more.

Electrical Safety
The special requirements of safety as it applies to electrical circuits and components is discussed. Emphasis is placed on safety procedures such as Lockout/Tag Out and other common requirements. Students will learn how to identify electrical hazards and how to determine the lethality of circuits from Arc Flash. This lesson is a suggested prerequisite for Electrical Trouble Shooting.

Control Circuits
The basic parts of a circuit are explained along with how to arrange circuits to obtain a specific result. Previous lessons on electrical components will be reinforced as specific applications are examined. This lesson is a suggested prerequisite for Electrical Trouble Shooting.

Introduction to Process
This class will introduce the student to the basics of process control used in manufacturing. Topics covered will include: process control concepts such as open and closed control loops, cascading control, ratio and relational control. Also included is an introduction to flow, pressure, temperature, level and analytical sensing. Signal processing and conditioning are also covered.

Introduction to PLCs
The topics covered include: hardware components, communication networks to the PLC, understanding uploading, downloading, online, offline, run mode, remote mode, program mode and basic PLC programming. This course is designed for students with minimal to no PLC experience.

Motors
The basics of how electric motors operate along with their principle parts are explained. Nameplate data, winding configuration, along with common failure modes are discussed. This lesson is a suggested prerequisite for Electrical Trouble Shooting.

Shop Math and Measuring
This lesson introduces the students to bearing selection and arrangements. Also covered are bearing applications used in industry. Hazards are identified and safe operation techniques are explained. A brief overview of OSHA hand tool requirements is given.

Electrical Troubleshooting
This fundamentals course will help you establish skills to locate problems in a safe and efficient manner. A basic knowledge of AC/DC fundamentals is a requirement. This class will introduce you to the latest equipment used throughout industry and teach you how to use those tools in the field. You will learn how to follow a systematic approach to problem solving and how to interpret standard electrical schematic diagrams. The hands-on portion of the class will provide you with actual problems and will help to gauge your learning and identify growth areas.

Precision Measuring
This lesson covers the basics of making precision measurements using common precision tools. Topics include: use of a Vernier Caliper, Dial Caliper, Micrometer. Analog and digital devices are covered along with the proper techniques for use of the tools.

Introduction to Bearings
This lesson introduces the students to bearings used in industry. Topics include: types and application of bearings, limitations and proper selection. Also covered are bearing selection and arrangements.

Electrical Troubleshooting
The fundamentals of how electric motors operate along with their principle parts are explained. Nameplate data, winding configuration, along with common failure modes are discussed.

Electrical Troubleshooting
The fundamentals of how electric motors operate along with their principle parts are explained. Nameplate data, winding configuration, along with common failure modes are discussed. This lesson is a suggested prerequisite for Electrical Trouble Shooting.

Shop Math and Measuring
Designed to strengthen basic math skills, this face-to-face course will cover properties, rounding, estimating, comparing, converting, and computing whole numbers, fractions, and decimals. Participants should be able to perform basic computations and solve relevant mathematical problems. Great for welders, mechanics, or anyone working in a hands-on skill.

Intro to Blueprint & Mechanical Drawings
This course provides instruction and exercises along with how to arrange circuits to obtain a specific result. Previous lessons on electrical components will be reinforced as specific applications are examined. This lesson is a suggested prerequisite for Electrical Trouble Shooting.

Basic Machines
Modern industrial machinery is really a collection of basic machines that have been around for hundreds of years. This class explains how basic machines, levers, screws, inclined planes, and others are used in sophisticated manufacturing.

Power Transmission-Belt Chain
Participants will gain knowledge about the basics of power transmission including belt and pulley, chain and sprocket and gear trains.

Conventional Alignment
This lesson covers basic shaft alignment using conventional, non-laser methods. Topics include the use of dial indicators, set up, calculation of error, soft foot correction, etc. Students perform an actual alignment.

Intro to Tools of the Trade
This lesson reviews the many types of hand tools and hand-held power tools found in industry. Hazards are identified and safe operation techniques are explained. A brief overview of OSHA hand tool requirements is given.

Introduction to Process
This class will introduce the student to the basics of process control used in manufacturing. Topics covered will include: process control concepts such as open and closed control loops, cascading control, ratio and relational control. Also included is an introduction to flow, pressure, temperature, level and analytical sensing. Signal processing and conditioning are also covered.

Introduction to PLCs
The topics covered include: hardware components, communication networks to the PLC, understanding uploading, downloading, online, offline, run mode, remote mode, program mode and basic PLC programming. This course is designed for students with minimal to no PLC experience.
INDUSTRIAL TECHNOLOGY

Bearing Installation
This lesson explains to the students the proper methods and tools to use when installing a bearing. Students will remove and install bearings.

Approved course for ★ BIMT Certificate - Mechanical
- 92081 $129 D Yotter
- W, Jun 5 10:30 AM - 3:30 PM SCC WB 605

Compressors & Pneumatic System
This lesson presents the basics of compressed air systems including descriptions of the machinery, pneumatic symbols, and common layout. Troubleshooting issues are discussed.

Approved course for ★ BIMT Certificate - Mechanical
- 92088 $179 D Yotter
- Th, Jun 6 8 AM - 3 PM SCC WB 605

Basic Hydraulics
This lesson covers basic principles of hydraulics and hydraulic systems. Pascal’s Law and Bernoulli’s principle are explained. How fluid systems work as well as the parts that make up the system are explained.

Approved course for ★ BIMT Certificate - Mechanical
- 92089 $129 D Yotter
- F, Jun 7 8 AM - Noon SCC WB 605

Lubrication
This lesson covers the basics of industrial lubrication including liquid, semi-liquid and dry lubricants. Oils, greases and dry lubricants are explained and discussed in detail. Students should be able to better understand how to properly select lubricants for a given job after completing this course.

Approved course for ★ BIMT Certificate - Mechanical
- 92090 $79 D Yotter
- F, Jun 7 1 - 3 PM SCC WB 605

Pumps and Valves Fundamentals
While utilizing hands-on demonstrators, this class will review pump topics such as: pump construction; classification of pumps; pump seals; advantages and disadvantages of various types of pumps; and the effect of head pressure, cavitation and media. Covered valve topics include: valve construction; classification of valves and types; advantages and disadvantages of various types of valves and valve trim. Also covered will be how pumps and valves are used in a process control scheme.

Approved course for ★ BIMT Certificate - Mechanical
- 92091 $129 D Yotter
- W, Jun 5 10:30 AM - 3:30 PM SCC WB 605

Trouble Shooting Mechanical
This lesson will introduce the student to basic mechanical trouble shooting methods. An emphasis will be placed on using a Universal Trouble Shooting Method as well as using logical thinking to discover the root cause of a mechanical failure. Problems will center around failure scenarios of standard mechanical systems including power transmission, pneumatic and hydraulic systems.

Approved course for ★ BIMT Certificate - Mechanical
- 9999 $179 D Yotter

Industrial Safety
This lesson provides the basic understanding of the dangers and safety methods found in industrial manufacturing. Topics include: rotating machinery safety, fall prevention, material handling, confined spaces and others. Students will be provided with the basic knowledge to help them identify dangerous situations and how to take appropriate action.

Approved course for ★ BIMT Certificate - Mechanical
- 9999 $179 D Yotter
- F, Sep 13 8 AM - 3 PM SCC WB

NEW Self-Paced Industrial Maintenance Training
Enjoy the flexibility of self-paced learning in our state-of-the-art Industrial Maintenance Training facility at the SCC Keokuk Campus. Participate in lecture through online e-learning. Take what you learned online and apply it through hands-on lab activities in an open lab environment to ensure mastery.
Lab hours are M – Th, 8 am - 7 pm through May 3. Call 319-208-5375 for pricing and availability.

Instrumentation
This course introduces students to the basic principles and concepts of process control, calibration, replacement, repair adjustment, troubleshooting and use of test equipment. Students will learn how to calibrate, adjust, install, operate, and connect process control systems. Students will also learn how to measure signals and connect devices in a wide variety of control configurations including: PID control, on/off control and manual control.

Motor Controls
This course discusses Motor Controls, components, operation and service. Students will learn electric relay control of AC and DC electric motors found in industrial applications. Students will also learn industry-relevant skills including how to operate, install, design and troubleshoot AC and DC motor control circuits.

Motor Drives
This course discusses the fundamentals of motor drive operation and setup. Students will learn industrial AC electronic motor drives, which are used to provide accurate control of speed, position and acceleration of industrial motors. Students will also learn industrial skills on how to operate, install, tune and troubleshoot various industrial drives.

Power Transmissions
This course discusses the fundamentals of mechanical transmission systems used in industry. Students will learn industrial skills on how to operate, install, analyze performance, and design basic mechanical transmission systems using chains, v-belts, spur gears, bearings, and couplings.

Boiler Operation & Controls
This course is designed to help students understand the evolution of the boiler system from the first century to modern day and understand the principles and applications of steam traps. This course will provide an overview of the operation of the boiler plate system, beginning with basic principles of steam energy and boiler plate design. This course will describe steam, steam trapping and different types of steam traps including sizing, installation and monitoring.

OSHA INSTRUCTORS NEEDED
OSHA 10 & 30
Must be authorized to teach per OSHA regulations.
Part-time positions available.
Details & application can be found at scciowa.edu
Check the Employment link.
ON THE COVER:

ALIGNING PASSION AND SKILLS FOR CAREER SUCCESS

Austen Totsch’s love for cars runs deep.

When the auto tech program at his high school was canceled during his senior year, he looked to fill the void of his interest in technology and cars by pursuing another path. Knowing he was SCC-bound, he chose to study animation.

“Even then, I found myself making virtual 3D models of cars,” Totsch joked.

But after earning his animation degree in 2017, he found that he'd rather work on cars than draw them. That’s when he decided to return to SCC and enter the automotive technology program a year later.

He spent the next two years soaking up all the knowledge in the classroom and in the shop that he could from SCC instructors Tim Hunter and Wes Carpenter.

He was where he needed to be.

After completing his first year, he spent the summer working at Quick Lube at Deery Brothers in West Burlington.

That led to bigger opportunities.

His boss liked what he saw and promoted him to maintenance technician apprentice repairing Toyotas, Nissans, and Mazdas.

He made the most of the opportunity, working about 35 hours a week on top of his class load.

“I learned a lot working under our master technician,” Totsch said.

He completed his degree in 2020 and immediately started working at Deery Brothers full time.

“We teach our students to think like engineers,” said SCC instructor Wes Carpenter. “If they can figure out what the engineers were thinking when they first designed the car, they can diagnose issues faster and more accurately.”

That approach to learning is exactly what area employers and auto manufacturers want to see in a training program.

In 2021, SCC signed a novel new training partnership with Toyota USA. Serving as the first specialized training partnership program in the Midwest, SCC’s Toyota TECS Elite program (Toyota Education College Support) is a capstone course for students and for current Toyota technicians to learn specialized skills.

“Students learn to use proprietary tools on Toyota vehicles,” explained SCC Dean of Career and Technical Education Dr. Ashlee Spannagel.

The 6-week course is a mix of online and face-to-face lab instruction. Students who successfully complete the program will earn a Toyota Maintenance certification.

Mark Olson, Toyota’s technical services and training manager for the Kansas City region, is looking forward to the fruits of the partnership.

“Education is key,” said Olson. “This program will benefit both students and our dealers.”

Totsch would have loved to take the course. “I’ve already completed over 1000 hours in Toyota, Nissan and Mazda training,” he said. “Having that certification at the start would have helped me advance faster.”

Austen is excited about his chosen career path. Currently a certified line tech, he stays plenty busy working on two to four vehicles in his station on any given day, troubleshooting, diagnosing and repairing each one.

“I’m on track to earn my master technician certification with Toyota and Mazda.”

-Austen Totsch

For more information on SCC’s automotive programs or the Toyota partnership programs, contact Rachel Boyd at rboyd@scciowa.edu.

FOR STUDENTS GRADES 9 TO 11

AutoTech Clinic

Do you have a love for cars, or just want to learn the basics? Join us and get your hands dirty learning how to change tires, do oil changes, and general mechanical tasks. You will learn from industry professionals and explore different career opportunities. No experience is necessary; you will learn the basics on up. Come with experience or broaden your skills. Geared for students grades 9 – 11.

INDUSTRIAL TECHNOLOGY

WELDING
Shielded Metal Arc Welding Certificate
In this American Welding Society "SENSE" aligned course, participants will learn the fundamentals of Shielded Metal Arc Welding (SMAW) welding, informally known as "Stick" welding. SMAW is one of the first and most popular welding processes. It is used extensively in industrial fabrication and the construction of steel structures. Topics covered include: welding safety, hands-on SMAW welding in all positions using various electrodes, applied math, blueprint reading and welding symbol interpretation. Welding material will generally be limited to carbon steel.

TUITION ASSISTANCE MAY BE AVAILABLE
CREDIT OPTION. CALL 319-208-5155

Production Welding Certificate
This course is designed for the participant who desires employment in production welding. Curriculum will be delivered through a combination of classroom lecture and hands-on training in a welding lab. Topics covered include Welding Safety; Applied Math; Blueprint Reading and Welding Symbol Interpretation; and MIG welding. Successful participants will have the necessary skills to obtain entry level employment in the high demand area of production welding.

TUITION ASSISTANCE MAY BE AVAILABLE
CREDIT OPTION. CALL 319-208-5155

brubey@scciowa.edu
ENVIRONMENTAL & INDUSTRIAL SAFETY

ALCOHOL AND OTHER DRUG SAFETY

Alcohol and Other Drug Awareness for Managers & Supervisors (Initial Training)
Iowa’s drug testing law (Iowa Code Section 730.5, paragraph 9.h. and Administrative Code Section 640) enhances worker safety by creating workplaces that are free of drug and substance abuse. One tool available to private sector employers is drug testing (inclusive of alcohol testing). A private sector employer who chooses to use this tool must attend a minimum of two hours of initial training to begin, and a minimum of one hour annually for update or refresher training. This training meets the initial two hour training requirement and includes information concerning the recognition of evidence of employee alcohol and/or other drug abuse, the documentation and corroboration of alcohol and/or other drug abuse, and the referral of employees who abuse alcohol and/or other drugs to the employee assistance program or to the resource file maintained by the employer pursuant to paragraph “C”, subparagraph (2) of the Iowa Code. This course also satisfies the requirements for supervisor training.

Forklift Operator Training
This course is designed to meet the training requirements for OSHA standard 29 CFR 1910.178. Training topics include: mechanics, inspection, and maintenance of forklifts; ANSI driving procedures; lift operation; and special operating rules. This course includes a driving module that allows participants to operate a forklift. Must be 18 years of age or older to participate.

Forklift (PIT) Train the Trainer
Instructional delivery of lecture and hands-on training to provide a training program expanding on the trainee’s prior knowledge, the types of vehicles used in the workplace, and the hazards of the workplace. Course will utilize group discussion and hands on practice. Each operator will be able to conduct driving skill audits, obtain the knowledge and skills needed to do their job correctly and safely. Trainers must hold a Basic Forklift (PIT) Operator certificate as a prerequisite for this training.

OSHA
NFPA 70E Arc Flash
This course is an OSHA requirement, and involves educating employees about the dangers of arc flash from electrical devices. Employees are required to understand the potential danger from arc flash, how arc flash is categorized, and what can be done to limit exposure.

MACHINING TRAINING AT SCC
Manufacturing is now high-tech as companies improve the quality of their equipment, products, and employees.

> Manual Machining
> CNC Programming
> Mastercam
> Quality & Inspections
> Math & Measurement

Contact cbiz@scciowa.edu or call 319-208-5375.

DID YOU KNOW?
Precision machinists are among the top five most needed employees.
TRANSPORTATION

COMMERCIAL DRIVING

The trucking industry is one of the fastest growing and largest employment sectors in today’s economy. The Center for Business at Southeastern Community College offers convenient, stream-lined, CDL training programs designed to get you on the road quickly.

- Classroom and hands-on instruction
- Tailored training programs (full & refresher)
- Solid reputation—we have trained drivers from across the United States
- Full tuition assistance may be available for those who qualify
- Training meets all Federal regulations effective 2.7.22 SCC offers both classroom theory (ELDT) and range/over the road training also known as Behind the Wheel training (BTW).

NOTE: Class dates subject to enrollment classes are subject to change due to weather, class size or end of class testing at DOT

CDL Class B to Class A

This training will meet the Federal Motor Carrier Safety Administration (FMCSA) training standards for individuals upgrading their Class B commercial driver’s license to a Class A commercial driver’s license. This course is designed for those who currently hold a Class B CDL and are seeking to upgrade to a Class A CDL. You will receive both the Theory and Behind the Wheel training required. After an evaluation by an SCC CDL instructor the course will give special attention to the areas you need the most in both the theory and the BTW. Areas such as safe semi-truck driving skills in backing, turning, shifting, coupling and maneuvering will be given extra attention. A CDL Class A permit (CLP) will be needed from the Department of Transportation. You must take any portion of the knowledge tests not already included in your Class B license. Those include Combination, Air Brakes, and General Knowledge. Payment for the course and a permit are required to register. Once registered CBIZ will request the student to show proof of a current DOT medical card and a recent drug screen. Great River Business Health is SCC’s approved vendor for these screenings if needed. Call 319-208-5375 for more information or to enroll.

CDL Class B Behind the Wheel

Classroom and hands-on instruction with tailored training programs to fit your needs. The Class B CDL is the second heaviest weight class, with commercial motor vehicles (CMVs) weighing more than 26,001 pounds and trailers weighing less than 10,000 pounds. A Class B CDL gives drivers more opportunities for local and flexible truck driving jobs in areas like construction, shipping, and public transit. A CDL Permit (CLP) theory training and funding are required to be able to register for the BTW program. Students must have a CLP from the DOT that includes two tests: General Knowledge & Air Brakes.

Fee includes; Books, DOT physical, drug screen, class B permit and license fee. Call 319-208-5375 for more information or to enroll.

CDL Theory Online

You can now take our CDL theory class online. As with our in-person theory class, Class A CDL applicants must complete the Class A CDL curriculum known as Theory training per the new Federal guidelines. The curriculum pertains to combination vehicles. This theory training may also be taken for those wishing to obtain their CDL Class B license. (CDL Permit) In addition to the theory training, participants needing to obtain their CLP (CDL permit) for the driving portion or behind the wheel (BTW) training will receive valuable information during the theory training that will prepare them to take and pass all three parts of the required DOT tests which include; general knowledge, combination, and air brakes. Call 319-208-5375 for more information or to enroll.

CDL P Endorsement

Any driver wishing to operate a vehicle designed to transport 16 or more passengers, must have a passenger endorsement on their CDL. To obtain this endorsement the student must pass the CDL passenger knowledge test at the DOT prior to registration. Once registered the student will receive the required training (ELDT) in accordance with the Federal regulations. This will enable the student to take their DOT Passenger Endorsement testing consisting of pre-trip, skills, and a driving test. Call 319-208-5375 for more information or to enroll.

CDL Theory & Permit Training

Class A CDL applicants must complete the Class A CDL curriculum known as Theory training per the new Federal guidelines. The curriculum pertains to combination vehicles. This theory training may also be taken for those wishing to obtain their CDL Class B license. (CDL Permit) In addition to the theory training, participants needing to obtain their CLP (CDL permit) for the driving portion or behind the wheel (BTW) training will receive valuable information during the theory training that will prepare them to take and pass all three parts of the required DOT tests which include; general knowledge, combination, and air brakes.

CDL Class A Behind the Wheel

Our four week behind the wheel program will help you learn the safe driving skills necessary to get your Class A CDL, and in return receive the potential for a lucrative career with excellent pay and benefits. Times for all classes are subject to change due to weather, class size or end of class testing at the DOT. A CDL permit (CLP), theory training, and funding are required to be able to register for the BTW program. Students must have a CLP from the DOT that includes three tests: general knowledge, combination, and air brakes. After registration, CBIZ will schedule a drug screening and DOT physical to occur before the first day of class. Fee includes tuition, books, DOT physical, drug screen, license & permit fees.

**Motorcycle Safety BRC**

Successful completion of this 15-hour course, approved as a basic motorcycle safety course by the Iowa Department of Motor Vehicles, can result in a waiver for the driving portion of the motorcycle license endorsement. The course also fulfills the State of Iowa’s mandatory motorcycle driving requirements for legal riders up to 18 years of age. It is open to any other rider, new or experienced, that is interested in learning safe riding techniques and/or desires to obtain a motorcycle endorsement on their state of Iowa driving license. If over 18 years of age and the rider successfully completes the course, Iowa will waive the skills test requirement for obtaining a motorcycle endorsement on an Iowa driving license. Bring a helmet, gloves, face shield, goggles, or approved DOT eye protection. Wear long sleeves, long pants, and leather shoes or boots that cover the ankle. Motorcycles are provided. Your book is included in the course fee. The class is limited to 6 (1 rider coach) or 12 (2 rider coaches). Participants will get a link to the MSF (Motorcycle Safety Foundation) e-course and must successfully complete this prior to in-person class instruction.

**SCHOOL BUS CONTRACT TRAINING FOR SCHOOL DISTRICTS**

We know that skilled school bus drivers are a key factor to getting our students to school safely, on time and ready to learn. Whether it’s upgrading the skills of current employees or training for new employees, we can help!

We offer flexible, competitively-priced custom training options.
**NEW** Easter Meal Without the Hassle
Wow the friends and family with a no-hassle Easter Meal! Your menu will include a honey glazed ham, roasted vegetable medley of carrots, asparagus, onions, garlic, tricolored mini potatoes, and brussel sprouts, a side of fresh sweet spring peas, potato salad, and a carrot cake. With this simple menu, you are sure to have a Hoppy Easter!

**NEW** Spring Cleaning and 28+ Uses for Apple Cider Vinegar
Nothing beats that feeling of accomplishment when you get a head start on spring cleaning. If you space out your spring cleaning list over a couple weeks, it might not seem like an overwhelming task. We’ll talk cleaning tips from organizing to cleaning like pros. In this class, we’ll also discuss the countless uses of apple cider vinegar. Don’t let the dust bunnies kill your cleaning fairies!

**NEW** April Showers Bring Recipes with Flowers
Edible flowers! Flowers aren’t just for looking and smelling. In this class, you’ll learn about edible flowers and ways to incorporate them into your recipes: edible flower shortbread cookies, floral crostini, flower and herb butter boards, and edible floral spring salads. This course will demonstrate each of these floral cooking techniques. "I must have flowers. Always and always." - Monet

**NEW** How to Write a Cookbook
You have a passion for cooking and everyone is always asking you for your recipes, so why not write a cookbook? We’ll talk about the various types of publishing and what may work best for you. Then you’ll need to develop your content. What’s your category or theme for your cookbook? What’s the content? Do you have an outline in mind? What about photography? "Anyone can cook." - Gusteau, Ratatouille from Disney Pixar

**NEW** BBQ - How to Feed a Crowd
Summer barbeque’s equals feeding a crowd. Make it look effortless with a crockpot hotdog bar, sheet pan burger sliders, a layered salad, watermelon that wows, and lemonade. We’ll talk side dishes, and I’m not talking about Wendy Peffercorn. Let’s, chill and grill!

**NEW** How to Start & Write a Food Blog
Want to start a food blog but don’t know where to start? We’ll start with the basic steps of starting your food blog: naming your blog with a matching domain name, using a blogging site, themes, planning your content, and frequency of blog posts. Learn about the best food blogs in the industry. Share your passion for cooking or baking with the world! "A recipe has no soul. You, as the cook, must bring soul to the recipe." - Thomas Keller
This class is for those interested in increasing their knowledge and enjoyment of opera. It is designed as an introduction to the subject - no prior knowledge is required. Five famous operas will be covered (one per session): Tosca, Fidelio, Boris Gudenov, Don Giovanni, and Don Carlos.

### PHOTOGRAPHY

**Discover Digital Photography**
Gain the skills you need to take great photos with your digital camera and never miss a memorable moment again. This course is an informative introduction to digital photography, from DSLRs to smartphone cameras.

**Photography Suite**
In this series, you will not only learn how to decide which is the best type of equipment to use, but you will also master the use of your DSLR camera as you learn how the technology can help you take beautiful portraits and action shots of people. You will get a crash course in all the features and controls on your camera that can be used to elevate your photos and learn photo editing techniques for professional-looking images. By the end of this series, you'll be well on your way to becoming a skilled photographer.

### WELDING

**Welding Art 101**
Learn the basics of joining metal pieces through MIG welding. In this class you will make an art project with a limited number of horse shoes and learn the basic weld. Come with ideas or suggestions to share. Participants must wear cotton long-sleeve clothes and leather, closed-toe shoes. Those with medium to long hair must tie back. Safety glasses, welding gloves, jackets, and helmets will be provided, but you are encouraged to bring your own.

**Welding Art 102**
This open lab format will help you fine tune the basic MIG skills that were learned and get your creativity moving. You will be supplied with some materials. You are encouraged to bring your own found metal. Safety glasses, welding gloves, jackets and helmets will be provided, but you are encouraged to bring your own.

### FINANCE

**Real Estate Investing**
Discover how to make money in real estate, even if you have little to start with. This course includes specially designed worksheets and hands-on activities to take the guesswork out of your investing in the real estate market.

**Introduction to Stock Options**
Learn to evaluate, buy, sell and profit from stocks. This course will arm you with investing tools that were once thought to be only for the pros as you learn how to protect your portfolio and profit in the down market, an up market, or even a flat market.

**Introduction to Animation**
Do you want to make your own animations but don't know where to begin? Animation is often seen as an overwhelmingly difficult subject to learn. This class will teach you the basic principles of animation through the same exercises professional animators use. By slowly layering these principles together we will build up to more complex animations over the course. By the end of this course you will be equipped with all of the skills you need to start creating your own animations.

### YOUTH

**Super Sitter**
This class is designed to give boys and girls, aged 11 years and older, the knowledge and experience to be super babysitters. Safety, first aid, positive guidance and play activities will be emphasized. Students should bring a sack lunch.

### MOPED SAFETY

A certified moped course must be completed by anyone 14 or 15 years of age wishing to obtain a moped license in Iowa. Certificates will be issued to those who successfully complete the course. Students should bring a sack lunch.

---

**NEW Hydroponics Gardening**
What if you could grow food without any soil, using only water and nutrients? That may sound like science fiction, but it's actually an ancient and modern technique called hydroponics. Learn the basic techniques and methods to become a Hydroponic Gardener!

**PULLING AND BACKING – BOATS, CAMPERS, TRAILERS, AND MORE**
Are you pulling a boat, RV or trailer and can’t seem to back straight? This course is for you. In this 6 hour course you will get hands-on experience with a professional instructor to learn the proper methods for pulling trailers, boat, RV or utility trailer.

IMPORTANT INFORMATION

Registration must be received no later than 3 business days prior to the start date of the class. You are not officially registered until payment is received. Classes with insufficient enrollment are subject to cancellation.

Refund Policy
If your plans change, you must cancel your registration at least 3 business days prior to the start of the program in order to receive a refund. Business days are Monday through Friday, with the exception of SCC school breaks and holidays. Please note that if you don’t cancel and don’t attend, you are still responsible for payment. If you cannot attend a course, it may be possible to send a substitute in your place. Please call in advance to make those arrangements.

Inclement Weather
If classes must be postponed or cancelled due to inclement weather, announcements will be broadcast on local radio stations and posted on the SCC website.

Payment Methods
When you call to register, you can pay with credit or debit card. To pay by cash or check, you must either fill out the registration form below and mail it with your payment, or register and pay in person at SCC’s West Burlington or Keokuk locations.
