Want a cool job in Information Technology? SCC’s got you covered. Learn how to build and maintain computers, design and protect networks, develop websites, make computer animation, and master social networks.

- **Animation for Television, Film, and New Media**
  Study the fundamentals of animation and storytelling. Then learn the same software used by studios large and small to make compelling animations for various applications.

- **Interactive and Social Media Marketing**
  Social media isn’t just for fun. Learn how businesses use it to engage customers to market products and services.

- **Network Administration and Cyber Security**
  Computer networks are what make modern communication possible. Learn how to build and maintain networks large and small. Then learn how to keep them safe and secure from threats from within and without.

- **Web Design and Development**
  Websites don’t just have to look pretty, they need to be usable for visitors. Learn what makes good websites, good, and bad websites, bad. Then learn how to build and maintain them.

Get your geek on at SCC.
Thinking about a career in manufacturing or industrial technology?

SCC’s the place for you. As long as there are companies that make stuff, there will be a need for people to keep them up and running. Our programs prepare students for careers in manufacturing settings of all kinds.

- **Advanced Manufacturing Technology**
  Learn what it takes to design products and then program the machines that bring them to life. Learn mechanical and electrical fundamentals and then build your skills with 2D and 3D computer aided design (CAD) programs and process logic controls (PLC) programming.

- **Drafting Technology**
  You can’t make anything until you design it. Learn the skills to master computer aided design (CAD) software and how design is a process that involves a number of players. Program options give you the flexibility to learn special skills in specific areas of design.

- **Electronics Technology**
  Electricity is vital to our world, and it is everywhere. Learn how it works and how it’s applied in every part of our life. Understand how computers work, how they’re built and how to program them. Develop skills in mechanical design, construction, analysis and repair of various electronic circuits.

- **Industrial Maintenance Technology**
  It takes expensive machines to make stuff in today’s world and they pay big bucks to people who can keep them running. Develop strong mechanical and electrical skills so you can troubleshoot and maintain practically any machine in today’s modern production facilities.

Make stuff that makes stuff.
Health Programs at SCC

Ever been to a hospital in the area? Chances are a SCC grad helped you!
With programs in a number of popular fields, you can find our grads in healthcare facilities from small offices and clinics all the way to the some of the largest hospitals in Iowa, Illinois and Missouri.

Degree Programs:
- Medical Assistant
- Medical Coding & Billing
- Nursing - LPN, ADN
- Respiratory Care

Highlights:
- Learn on the same state-of-the-art technology employed in today's healthcare settings
- Rigorous classroom learning and extensive clinical experiences mean our grads are in demand
